Hello Everyone,

On August 26, 1998, I posted a warning message about doing business with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message on the newsgroups in late June, 1998 for laptop computers for a "law enforcement" project. I e-mailed him about a Toshiba Pentium notebook I had for sale that was not working and needed minor repair. I specifically explained to him what was wrong with the notebook, we agreed on a price and Roland Geter agreed to pay shipping. He requested Fed Ex C.O.D. shipping, since he "did a lot of business with the shipping depot in Pheonix Arizona" and things would go a lot easier. It cost me $132.58 in shipping and C.O.D. charges to ship the package.
I shipped the package as per his specifications and request and advised him of such. When the package arrived in Arizona, Roland Geter failed to pick up the package as requested by Federal Express several times. After several days the package was returned to me less my shipping charges I had already paid.
After that, I contacted Roland Geter several times by e-mail and phone to no avail. He always told me he was sending payment but never did. I finally took further action in late August, 1998. I posted the original warning message, contacted the proper authorities and filed a formal complaint with the Maricopa County Sheriffs' Office in Arizona. Roland Geter had stated to me he was a deputy with that sheriffs' office, (which later proved to be false).
After a lot of pressure from many on the newsgroups and the sheriffs' office, Roland Geter contacted me in late September to call a "truce" and settle our dispute. I had received several e-mails from others who had been ripped off by Roland Geter so he agreed to pay me and then "square up" with the others. At that time I also agreed to stop the pressure from the newsgroups and the sheriffs' office
To make a long story short, to this day I still have not received my money. I have tried to contact him several times a week to no avail. The others involved also have not received payment.
I am continuing to follow up with the authorities involved. I am posting this message to warn others of Roland Geter's bad dealings, i.e. bad checks, failed payments, bad trades, etc., that he has done to many, many others and myself. Do yourself a big favor, do not deal in any way with Roland S. Geter, Sr.

Piero

This really does not constitute fraud. Looks like he just changed his mind
to purchase a dead laptop. As a seller you always risk that someone will
change his/her mind while waiting for the package to arrive. maybe he
found something better.

So if you can please explain in detail what fraud has taken place? People that buy on the internet are looking for deals. When a better comes by than i am sure that majority if you will go for the better deal. I have sold things on the internet COD, I have gotten bad checks refused packages...etc. I do post if i am defrauded in anyway, but if I get a refused package than that my loss.....it would be my fault because I did not close the deal securely. i wont go crying to a ng.

I never said anything about fraud. I'm not even clear on the legal
definition of fraud.
But since you asked, I will expound a bit about the "Golden Rule".

When I make a verbal contract to buy/sell an item, I buy/sell it per the
verbal contract. If I find a better deal, I might buy that TOO.
I DO NOT leave the other party holding the bag for my change of heart.

Yes, I've had it happen to me, but that's no excuse for me to do it to
you.

Remember that ILLEGAL covers only a small part of DISHONEST.
I do believe that it is beneficial to the group to expose those who are
dishonest. I also believe that there is some correlation between
condoning dishonesty and exhibiting dishonest behavior.

In summary, if you tell me that you think it's ok to refuse a COD on
a whim, you ain't never gonna get no COD from me. I'll probably also
suspect your other motives and never buy anything from you. It's my
choice based on your statements.

Is that detailed enough?

Cross-posted to: "Newsgroups,(Radio)","rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap,rec.radio.amateur.equipment",alt.rv,rec.outdoors.rv.travel,comp.sys.laptops

Let me clarify a few things....

1.) Roland Geter consummated the deal as a "member" of the Maricopa County Sheriffs Department. They were not and still are not happy about this. I filed an official complaint with them...(I'm a police officer in Pennsylvania). Needless to say, Roland Geter is no longer associated with the Maricopa County Sheriffs' Office.

2.) In Pennsylvania and Arizona (shipped from PA to Arizona) Roland Geter committed "Theft by Deception" by his actions.

3.) He didn't "change his mind", he scammed me as he did many, many others. Check out Deja News and do a search of his name, you will see over 500 hits for Roland Geter, many, many of them victims of his scams.

4.) I did make a mistake of trusting "a fellow law enforcement officer". Fortunately the ramifications for Roland Geter were a lot more expensive then the $132.58 I lost.

NL-760P, (4) @ $25.00 ea. plus shipping
NL-716 , (2) @ $20.00 ea. "
NL-1C , (3) @ $10.00 ea. "
710/6011, (2) @ $30.00 ea. "

Will sell as lot for $200.00 plus shipping.

All tubes are N.O.S. in original boxes. I would consider possible trades for tubes more suitable for amateur use.

I have a top case for Icom 781. It has some blemishes on it, but is not damaged or dented. (I just wanted to put a prettier one on, and paid Icom $207.58 plus shipping for it!!!) Sold my 781, so wondered if anybody out there might need a used top case at a reasonable price? It's Icom part number 969-05872. How about $65.00 and you pay the shipping? (That's about a 68% discount!). Please don't try to haggle me down or beat me up on this. If it gets any cheaper, it isn't worth sending. Happy New Year! Steve Sample / N9FD. (812) 948-2973. (E-mail is best for initial contact!) Thanks!

umm, not to be the politically correct one, but i honestly don't think you need to be calling people racial slurs just because they don't pay. i am white, but i also know many white people who do this stuff. be careful what you say, your life could depend on it in a city....or even a suburb.

As an honest black man, I find this comment totally unnescesary. I have made many deals on the Internet, and customer satisfaction and fair play have always been #1 to me. I wish when some unscrupulous people show their colors that people wouldnt go around generalizing about others and looking for a common denominator. There are good and bad in every race, sect and creed.

Well I have chopped a lot from this msg, and I really cant see why it was
posted to so many groups.
Anyway I am not going to argue about the merits of doing biz with Roland.
But hell guys aint any of you got brains?
I seriously cannot believe that you would send equipment prior to getting
paid for it regardless of method.
Unless the dough is in your hands the equipment should still be in your
hands, an due to popular belief there aint a lot the authourities can do for
you in most cases.
This is particulary true when dealing international or even interstate.
Be warned, get the money first, then send.

Just for the record, please read the replies carefully before sending me hate messages calling me a racist. Another person quoted my original message then added a racist slur at the end of my original message. At no time did I ever include any racial comments or slurs in my original posts and messages.

Piero

We have for sale (1) Kenwood TS-440S/AT radio for sale. We are asking $600US or best offer. The radio is in 8.5-9/10 condition with only minor scuffs on the top of the unit.

Has spent most of its life in the box (was for a project that never got off the ground).

Comes with original packaging, user's manual, and hand microphone.

The radio has had the extended TX modification done.

For more information check out the web page below.

Thanks!

As I posted...I DID NOT POST ANY RACIST REMARKS! If you bothered to read the thread you will see someone quoted my original THEN ADDED THEIR OWN RACIST REMARK. At NO TIME did I post a message from myself with a racist remark! You guys are certainly quick to criticize but slow to apologize.

Hi,

Price reduced to bottom dollar... selling FT-900/at in pristine condition
for $725 plus shipping. Radio has built in tuner, keyer, and not a scratch.
Never mobile. '95 manufacture. sorry, no xtra filters or seperation cable.
.30-30 rx plus MARS/CAP. Works great and puts out around 110 watts.. Must
have prepaid money order on this one. includes hand mic, box, manuals,
orig. factory paperwork, reciept of orig. buyer from AES, etc.
thanks for the time!
Randy

Is it me or has this list (rec.radio.swap) suddenly become less
Ham user friendly and more dealer, auction, and collector overloaded?

I am finding a tiny percentage of posts even vaguely of interest to a
typical Ham looking for something to add to his station without
breaking the bank.

Is there another Ham-specific newsgroup we might move to?
Perhaps rec.radio.amateur.swap or rec.ham-radio.swap?

Just a thought! Perhaps it is just a abberation of the past few weeks.
Or perhaps I just need more sleep! :-)

Exactly where to you find the word "ham" or "amateur" in rec.radio.swap.
You are already aware of two other newsgroups with these words in them...So
use them.

All too often, people speak of censorship in this newsgroup, from too much
commercial stuff to eBay bashing. I for one, want to see all that is
available to me, and then make an intelligent and informed decision whether
or not to buy something.

If you want to only be "ham specific", hang out on a newsgroup that
specifically caters to you guys. In my view, rec.radio.swap welcomes all.

I'm studying (hard) to upgrade my license and get on HF. I would like to find a Kenwood TS-520, since I've heard they're a good basic rig for a beginner. I have a Radio Shack HTX-242 mobile 2m and an Alinco DJ-C1 credit card 2m HT to offer in trade. Both are like new with the original boxes and manuals.

42. FS: Colorado Big Gun QTH

Newsgroup: rec.radio.amateur.swap
Date: 1999-01-08 00:00:00 UTC
From: Stan Huntting <stan@sni.net>
Message-ID: <775shv$8pc$1@news-2.csn.net>
Source record: 8876
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

In 1991 I realized a dream as old as my novice ticket: a station with a big gun antenna! I've had a ball with it but now I'm ready to realize another dream: to retire to live in the mountains. My Boulder, Colorado QTH will soon be listed for sale with my favorite realtor. But first, I want to spread the word of this rare opportunity.

Obtaining the permit for a tower in Boulder County is about as difficult as making DXCC Honor Roll. But I have just such a tower: 87' of Rohn 55G and mast, HyGain HDR300 rotator and a 10-element Tennadyne Log-Periodic. The tower permit stays with the site. And, the site is something else.

This QTH sits on the high ground between Boulder and Boulder Reservoir with commanding views in all directions. But, the signal radiated from this site defies simple analysis-it is a big gun antenna on a big gun QTH!

The house will sell quickly when listed. It's a comfortable and spacious home, on a acre of pastoral splendor within minutes of downtown Boulder. Hardwood floors, HW heat, passive solar, two offices, heated shop, unfinished basement...

Until it's listed, as a concession to an early buyer, I will include the tower & antenna with the property. Asking price is TBD but will be in the $500K range. Qualified buyers are urged to contact me directly. Pass the word. 73,

Stan Huntting, KW7KW

Hi People:

After 5 years of good service, I've decided to let my IC-502 go. The 502 is a 6 meter portable (about 6" high, 2" wide, and 5" deep). It has a built in 1/4 wave whip, so-239 connector, will take "c" batteries for true portable operation. It is has an analog scale covering 50 to 51 Mhz, and has USB and CW modes. I have worked most southern states (from EN93) using just the whip antenna and the built in "power house" amplifier (2 to 3 watts, of course when the band is open!!).

It comes complete with the original 4 pin mic, shoulder strap and mic envelope (a small pouch that is encorporated into the shoulder strap).

Sorry, no manual (I bought it used). I used to use it many times a year when I went camping, but times have changed, and the family doesn't go camping much anymore.

A solid 9 out of 10 on appearance and operation! Parts of the front face still have the removable plastic film protector.

$300 Canadian, or $200 USD

I currently have 2 Cessna RT/385-A NavCom Aviation Radios which I am interested in selling. I don't know much about the radios- however, from my experience and slight use, the radios are in excellent condition electronically and good condition cosmetically. One radio works on 14 volts, while the other will not transmit or receive unless supplied 28 volts.

I don't know exactly how much these are worth, but I know that new replacements are about $2700 list. I would like $1,000/radio. If this is that far off base please let me know- like I said, I don't know much about the market. Also, any other information would be greatly appreciated.

Please contact me ONLY via e-mail at TVSJR@SPRYNET.COM

Thanks!
Terry

Looking for the FIF-232C or the W1GEE interface cable Model LCU-3Y1 for Yaesu (FIF-232C Compatible)

Help with PK232 to FT990 hook-up:

The way that the Din plug looks in the book based on the diagram is that the little indent is on the botton that would
mean the narrow part is on the top. When you look at the back of rig it sahow the other way. When I hook it up based on the book. The rig keys ups but does not send Rtty correctly. I have wired like the following.

If you go by the FT990 Manual I wired the following: (Narrow part of plug on top)

Din Plug: Pin 3 goes to Red Pin 5 of PK232
Din Plug: Pin 2 goes to Green Pin 1 of PK232
Din Plug: Pin 1: goes to White Pin 2 of PK232

Symtoms: RIG Keys up and Receives great, But no RTTY.

If I wire the plug based on the back of the rig(FT990, Wide part of plug on top)

Wired the same as above

Symtoms: Rig stays in transmit mode

Any input would be appreciated muchly.

I recently parted a homemade transceiver, and have 2 good power transformers that may be of interest to someone trying to get an old boatanchor receiver going, or a Johnson transmitter going. Pictures/URL for your convenience.

The smaller one is a Thermador CS5565 400volts ct @.02 amps. Mounts easlily with 4 case screws, and connections are marked. $10.00 plus postage

The second is a 700volt ct about same size physically as the low voltage supply transformer in the Valiant. Leads are tagged. $20.00 plus postage.

71. Sophisticated Breadboard System/Digital Electronics Course FS

Newsgroup: rec.radio.amateur.swap
Date: 1999-01-13 00:00:00 UTC
From: lmarti49@linknet.net
Message-ID: <lmarti49-ya023580001301991252330001@news.idt.net>
Source record: 8905
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap,sci.electronics.basics,sci.electronics.components,sci.electronics.design,sci.electronics.misc

I have the following mint condition, unused, high-quality equipment and
materials
to sell:

--1 HEATHKIT 3201A "DIGITAL TECHNIQUES COURSE"
(2 Volumes).

--1 HEATHKIT ET3700 "DIGITAL TRAINER,"
Includes a total of 4 insertion-type circuit breadboard cards
in a single, well laid-out package.
Also includes:
built-in +-5 and +-12v power supplies;
a variety of square wave TTL clock signal outputs at up to 100 khz;
a built-in DVM/frequency counter;
on/off led logic state indicators, buffered data switches; etc.

It's perfect for quick breadboarding of experimental circuits by means of
inserting component
leads and #10 wires in the little holes on the breadboard cards.

--1 KIT OF IC'S AND OTHER PARTS for doing the experiments in the course.

I bought these items in 1989 just before I became interested in computers
instead of electronics, so I never used them. I had previously taken
Heath's DC Electronics, AC Electronics, and Electronic Circuits"
courses, and found them unusually clear and easy to use, so I suspect this
course is also.

NOTE: This course teaches the fundamentals of digital circuit design
(e. g., AND, OR, and NAND gates; shift registers, clocking, Boolean
operations, etc).
These principles do not change, even if the hardware does.
The course does not teach computer programming, etc. so it should not be
out of date.
The accompanying ICs are TTL.
The course allows you to learn entirely on your own, by means of
"Programmed Learning".
The subject is broken down into manageable units, in each of which they
first tell you what
they are going to explain to you, they explain it, then present an
experiment demonstrating
it. There are periodic tests to help you synthesize what you've learned.

TOTAL COST NEW: $430
COST TO YOU $200, shipped.

hello,
I "inherited" a Heathkit SB-101 but didn't get a manual.
Does anyone have any documentation? Would anyone be willing to
copy pages? Does anyone know where I can purchase a manual?

The unit seems to be in good shape but one of the tuning
rubber bands has broken. If the band is broken,
does the replacement procdeure include alignment?
Anyone know where I can find a replacement part?

Does anyone know anyone who can reliably service the unit?

BTW, I have not been active for quite a few years.
I hope this unit will get me interested in the
hobby again.

RARE AND DESIRABLE, VINTAGE SWBC ITEMS FOR YOUR SHACK!

1. WORLD RADIO TV HANDBOOKS!!! Complete your collection's gaps now!
-- 1965 (hardbound!) - beautiful shape, $45
-- 1968, 1969 - poor condition, $22 each
-- 1970, 1971, 1973 - vy rough condition, $16 each
-- 1974 thru 1979 - nice condition tho used, many covered with clear
plastic contact paper, $14 each
• 1980 thru 1988 - fine to near mint condition, $12 each
-- 1990 thru 1992 - near mint condition, $11 each
-- 1995, like new, $10

2. "NUMERO UNO" weekly private DX newsletter: Wow, a complete run of
issues from the heyday of this legendary DX weekly, from 1972 - 1984!!
Three binders, 3-inches thick each, jammed full of DX news, pioneering
reports on rare stations, feature articles, controversy, you name it.
Finally, you can now see just what all the noise was about and read what the
"elitists" (hi!) were up to! Full-sized 8.5 x 11 sheets, a stack of paper
9-nches thick, 600 issues. Won't break this up, to be sold as one lot.
$250 firm.

2. FINE TUNING: Again, a mother lode of early issues from another late
1970s/early 1980s private circulation DX every-couple-weekly: issues 1-70,
113-140, 172-239. One stuffed 3-inch binder. Plenty of great DX info. $50.

3. "RADIO NUEVO MUNDO" Treasure Trove: Issues 1-71 of the famous Japanese
LA DXing publication from the late 1970s into the early 1980s. Incredible
amount of info for the serious LA DXer. Also, includes two books, "LA
DXING", a photocopy of the first book and a bound copy of the second
edition, from 1982. Also, the special Fifth Anniversary edition of RNM.
And finally, to cap off this orgy of LA DXing paraphernalia, a few stray
copies of the Machu Pichu DX Club, published in Peru, and the Bolivia DX
Club boletin. $70.

4. "THE RADIO BOYS SEARCH FOR THE INCA'S TREASURE", here's one that you
never see, a hardcover "Hardy Boys" type of radio aficionado's novel for
kids, copyrighted 1922. Super condition. If you call yourself a diehard LA
Dxer, your shack isn't complete without this. $50.

5. SOUTH AMERICAN HANDBOOK: Very handy reference, and the historical
stuff, of course, doesn't age. Maps and geographic info make this classic a
must-have. Save twenty bucks and buy a used copy! 1983 - $8. 1976 - $6.

6. BROADCASTING STNS OF THE WORLD (FBIS), BOOKS I & II, 1974. Nice condition, 500 pgs of data from the US govt's listening posts. $10.

7. BEST OF LOUDENBOOMER: NASWA/FRENDX SWBC satire from the 60s & 70s. $6.

8. REVIEW OF INT'L BCSTG: 1983-84 Issues No. 75-87, $3.

9. PASSPORT TO WORLD BAND RADIO: 1988/90/91, $17.50 for lot of all 3 books.

10. VIRTUAL GRAB BAG OF RADIO REFERENCE BOOKS: Japan's "BCL" (date?); "DXing According to NASWA"; Radio Amateur's Handbook 1973; The ARRL Antenna Book. Take 'em all for only $12

11. POPULAR COMMUNICATIONS MAGAZINE: The First 18 issues!!!! Starts with the desirable Vol. 1, No. 1, in Sep. 82. Great reading and a lot of fun, too. Collectible. $35 for the entire lot, just under two bucks an issue. Great condition.

12. GRAB BAG OF RADIO STATION CASSETTE RECORDINGS: Here's a real assortment for the LA Dxer: 3 cassettes, two are recordings of Peruvian station IDs from the 70s and one is of Bolivian stations made by the Bolivian DX Club. Bonus: will toss in another 3, I don't know what they are, might even be old blank tapes, but could be better.. Based on just the first 3 alone, this is a real catch for Andes specialists. $20

13. DANISH SW CLUB INTL BULLETINS: 3/73 TO 7/80, three 3-inch binders chock full of info. Also, bulletins from the Finnish DX Club, 1967/68/71/72. Only $20 for all of it!

14. VINTAGE FRENDX!!!!!!! Saving the good stuff for the end, gang: A lonnnnnng run of the monthly publication of the North American Shortwave Association, FRENDX, from Jan 1971 through May 1984! That's 160 issues of nostalgia, news, radio information and feature articles, old names and faces, history of stations, etc. Virtually priceless! ..... but for you, the entire lot goes for $250, just a shade over a lousy buck-fifty an issue. You'll never buy such great reading, so cheaply, again ! (Bonus: a free year of SPEEDX, just for fun.)

15. ANDES FOLKLORICO MUSIC ALBUMS!!!!!!!! Here's a classic deal for the Latin DX specialists. Imported LP albums (get out your turntables!) from Ecuador, Peru and Bolivia, featuring that beautiful haunting music from the Andes. Finally, you can learn the different between a huayno and a passacalle! Special deal, assortments of 3 albums for $20, or 10 albums for $50. I have something like 50 albums to sell, so build up your collection now! Sorry, assortments will be as put together by me; no custom orders, please. I will try to make each lot as balanced a set as possible. Also, these are 20 years old and although look to be in tremendous condition, no guarantee that they will all play like new and some warping is probable on the discs.

IN ADDITION TO ALL PRICES ABOVE, BUYER PAYS SHIPPING/HANDLING.

Ralph W. Perry

Source record: 8919
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap,rec.radio.scanner,alt.radio.scanner

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Transceiver
Transmit : 140-150 MHz
Receive : 138-174 MHz
Output Power : 0.5 to 5 Watts (4 levels)

Scanner
Freq. : 25-950 MHz (Continuous, NO GAP)
Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
and Manual, but no original box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $300.00 U.S. plus shipping.

73, Robin

I have a Motorola full duplex radio for sale. It was private labelled for Western Electric as a KS21466, but is internally marked as a Mototola TUD1733A. I believe this is a VHF Pulsar II carphone, which would put it on 152/157MHz. It is complete and clean, including the 'Trisolector' duplexer. It is synthesized, and I have heard that with work they can be made into a repeater. I have a cable, but no head. I don't have a service manual, but can point you to someone who does. $100 and split UPS shipping; either check in advance or COD are fine.

This radio has seen very little use. It is a really nice little radio, but definitely for 'specialized' use. It would be a good radio to keep in your jacket pocket so you always have one handy. It will last up to 100 hours on a charge. This unit will receive 118-174MHz and transmit 136-174. It is complete with everything it came with (box, manual, snap-in charger). I have heard these radios are not longer manufactured, due to the introduction of the dual-band model, and are getting hard to find. I would like to trade for an Alinco DJ-S11 or sell outright for $75 + shipping.

Hi,

A really great accessory..... A high quality weighted spinner knob!
This spinner knob matches the band/tune/load knobs already on HENRY
amplifiers.
This knob will fit any other 1/4" shaft as well. Metal bushing with TWO set
screws, this knob is QUALITY!
When we want to move from 160M or 80M to the higher bands or back again
there sure is quite a few turns of the roller inductor (tune) needed to get
there.

Well, here is the solution!
I have been testing this knob for a few weeks and believe it's "just right"!
$32 delivered USA (Calif. add $2.39 tax), Foreign e-mail for shipping price.
RADIODAN has them! Credit cards OK.
See it at http://radiodan.com/Henry/parts/spinner.htm

Hello all,

I have an Icom Deskmike #IC-SM6 and need some info about it,
such as schematics and manual. All the wires from the gain pot on the bottom
have come loose and need to be rewired

Any help would be appreciated

1 Icom UT50 encode/decode tone board. 50$ shipped

1 Icom BP85 12 volt 5 watt battery pack,hardly used, 40$ shipped

1 Icom BP90 Alkaline case for S series,takes AA batteries, 10$ shipped
SOLD

1 Icom leather ht case,fits s series attatched to BP 85, 20$ shipped
SOLD

1 Icom 3SAT,220 HT, had a horrible life before I bought it,kept it going

the last two years by multiple repairs. Bottom plate needs
replacement,battery lock tab gone,internal battery is gone and have been

using these wires to supply 12 volts to the rig. Top input for 12 volts
is loose and has intermittant short,hence the jumper scheme.
Microprocessor OK,can see display by moving 12 volt plug on top. Numbers

on keys are readable,radio has lots of wear and currently does not work.

Too small and complicated for me to repair,good fixer-upper for someone
on a budget, 40$ Shipped SOLD

All items prepaid with US postal money order. Thanks W4AMP Jim O'Brien
Atlanta

Will consider offers for all,but individual prices are firm.

I've been looking for interesting ways to sell stuff on the internet.

Your method does address the growing problem of people saying they want it
and not following thru.

If ten people send you money, you'll have nine very angry people. How do
you deal with this?

My first thought was that it exposes the buyers to much greater risk of
fraud. One could get
10x the price and keep it all. After thinking about it a little, I guess a
person could always
promise 10 people that they bought it and get the same place.

Does it reduce the number of interested people? I'd personally never send
any money on a deal
like this. Just too much risk and too low probablilty. If you lived in
same town and I could
pick it up, then it might work to my advantage.

So, how does it work in practice? Does the grief you get outweigh the
potential delay of the
first person not following through?

Was supposed to be for my packet BBS but my 386 is cutting the mustard
just fine. It is set up as a Win95 net-surfer right now and it seemed
like overkill for my requirements. It's a 486DX with lotsa ram, modem,
soundcard, speakers, mouse/pad, keyboard and monitor.

$300+ shipping, w/o software - will trade for best radio

-Chuck

Hi,

CAN HAVE PROGRAMED TO YOUR SPECS.
I have 3 MT1000 pkgs. for sale. Radios are UHF mid split, (438-470) 8 channel, H44GCU7180AN model #, stubbies, beltclips, excellent condition! should be convertable to 16 easily. :)
In following configurations:

1 ea. MT1000, sp/mic, charger, battery..... $240

1ea MT1000, charger, battery..... $225

1ea MT1000, 3 batteries..... $200

Please contact via email.. Radios are guaranteed not DOA and in excellent condition. Shipping not included. (if u want all, or 2, I'll ship) No clue on the batteries as date codes are around 96-95, but they seem to hold a charge ok. Prepayment with postal money order, and can offer more info or pics to the serious inquiries..... as always, thanks for the time and bandwidth!

110. FS: Icom Delta-1A Tri-band handheld + Access.

Newsgroup: rec.radio.amateur.swap
Date: 1999-01-24 00:00:00 UTC
From: "Mark A. Keiser" <mkeiser@isi.com>
Message-ID: <36AA7E13.4834B046@isi.com>
Source record: 8747
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

For Sale: Icom Delta-1A Tri-Band Handheld
two-meter, 440 and 1.2 in one handheld radio

Includes:
Leather case (in poor condition, which is why the radio isn't dinged up)
Two (2) BP-102 Battery Packs (7.2v, 1200 mA)
One BP-100 Battery Case (for 6 AA batteries)
BC-79 drop-in rapid charger
AD-22 Charge Adaptor (the wall plug in thing)
UT-70 CTCSS encode and decode board
Comet CH-32 Miracle baby antenna (3 bands)
Maldol AH-212 Action Hunter antenna (3 bands)
Icom FA-38A antenna (3 bands)
HM-65 Speaker Microphone
The instruction manual
and even the box (I think)

-and- (the piece de resistance)

A custom built David Clark headset with split audio (i.e. transmit band
in one ear, two alternate receive bands in the other ear) from Racing
Radios in Forest Park, Georgia.

Why am I selling it? I got a Kenwood TH-D7A from Santa Claus and I want
to buy the visual communicator.

How much? $585.00

The process (and this may have been confusing the last time I sold a
radio in this forum): Whoever first sends me a cashiers' check or money
order for the amount takes the radio. If several people all say "I want
it" the first actually sending me $$ takes it. I'll take a personal
check, but I'll wait ten (10) days to see if it clears. If money shows
up after then and the check doesn't clear, the radio goes to the next
check or money order received. Unaccepted offers are returned - like if
I get a check the day after I have shipped the radio (it's not my intent
to rip people off).

My address is current in the callbook. I work in Sunnyvale, California,
if you want to see the radio first.

Hello Everyone,

I am looking for a very small dual band (2M/440) HT to keep with me at work. Doesn't have to be fancy, looking for something with 1/2 watt to a watt or better, such as YAESU FT-50, VX-1R,; KENWOOD TH-G71A,; ICOM IC-T8A or IC-T42A radios. Should be in good working condition but doesn't have to be brand new. I already have the tiny Alinco and it just isn't quite enough power or antenna, (poor telescoping antenna). Please respond directly by e-mail with description, accessories included, and asking price.

Thank you,
Piero - N3FVG

Greetings,

We have a Spectrum 440 repeater. Need a service technician who
can repair these units. Someone who will not need to study the manuals
for hours... Looking for a good repeater tech who knows this model.

Best of 73! And thanks for any pointers.

Intech 1000 Watt 1.6 to 30 mhz commercial radio station.
Class AB for voice and high speed data. Class C for
FSK and CW operation. Solid state mosfet PA.
Microprocessor controlled. Com 1000B amplifier,
PS 248 Power Supply, and COM 3620 Control Unit.
This is a complete HF station with transmitter and receiver
with a common control unit, and power supply all rack
mounted in a Rack about 3-1/2' high. The system is about
10 years old. Unit originally cost over $10,000. The company
is still in existance. I have all the manuals. Asking only $750
for the whole thing

Timex TI3000 125 watt solid state HF SSB radiotelephone system.
System consists of a Receiver/Exciter control head with keypad
entry and a Power Amplifier/Antenna Coupler (automatic antenna tuner). Unit
is microprocessor controlled and has the ability to store
48 simplex or 24 duplex channels in non-volatile memory
within it's operating range of 1.605 to 25.1 Mhz. Unit has extra
weather resistance due to it's design for commercial marine
applications. Operates from a 12 volt supply. I have all the operating
and technical manuals. Unit is about 10 years old but was only
in service about 1 or 2 years when purchased and hasn't been
used since. There is a minor problem with the microphone audio
circuit, but I've heard this has been successfully overcome by
bypassing that circuit with the use of a power mic. This unit cost
around $3000 when new.

Asking only $400 for entire system.

I Have some new heavy duty galvanized steel tower
side mounts to support verticals off the side of a tower.

Also, I have one side mount used for mounting a small
beam, such as for 2 meters or 440 off the side of a tower.
This mount supports rotor and antenna and nearly allows
antenna 360 degree rotation around tower.

$20 ea for the vertical mounts
$30 for the rotor/beam support

This is at least half what I paid and the vertical mounts are
in perfect conditon - never used.

I'm located near Tacoma Washington.

I have for sale a YAESU FT 736.
vhf / uhf all-mode base station.
stock bands are 2meters+ 70cm. also has 6 meters and 1.25 meters.
plus the FVS-1/1a Voice Synthesizer and the FTS-8 CTCSS Module.

on a scale from 1 to 10 this rig is a 8.
it has very light scratches on it, a a tiny tiny ding in the tuning knob.
i bought it this way. the radio has been to yaesu for a Dust and clean.
and the IF circuit replaced. i bought it broken and had it fixed.
it is 100% working condition and is looking for a good home.

First $1500 gets it shipped free. no trades i need the cash.

please reply to churchrr@home.com

Hello Everyone,

I am looking for a "stubby" or shorter SMA connector HT antenna (rubber duckie), for my ICOM IC-T8A. The supplied antenna is around 6"-8" long and I am looking for a replacement shorter antenna. Plenty of dual band stubby antenna's around but haven't seen a tri-band. If you have one for sale or know of a source, please e-mail me direct.

Thank you,
Piero - N3FVG

Give you an opportunity if you need some of this equipment before putting on auction. Parting out (painfully) a Nice Collins 32V2 tx. Just not enuf time to finish it.

1- 32V2 cabinet fresh re-powder coated (black), looks like new......$200. obo

1- 32V2 panel match with cab & freshly silk screened..$100. obo

Have a number of reproduced clear slide rule dials for 32V
$10. ea

The chassis I will part out & it is real clean, transformers, sub assemblies, all. Might do some trading. Want NOS certain tx & audio tubes. All the above + shipping. Terms: I prefer MC/Visa or MO.

211. MX-300T Conventional Use?

Newsgroup: rec.radio.amateur.swap
Date: 1999-02-15 00:00:00 UTC
From: seleong@gte.net
Message-ID: <7aa2mbgki1@news-2.news.gte.net>
Source record: 8700
Cross-posted to: rec.radio.amateur.swap,rec.radio.commercial-lmr,rec.radio.swap

Question: Does anyone know if the MX300-T 800MHz HT can be used as a simplex radio? I have a pair (MX-360 with keypad), the channel selector(bank or talk group?) knob is marked "A, B, C, D". The radio label states the radios have the following freqs: F1 860.7875FS, F2 859.7875, F3 858.7875, F4 857.7875, F5 856.7875. Model: N1336A. How can this radio have 5 frequencies yet only have a 4-position selector? All the radios do now is buzz (low freq. tone), at different rates depending on the position of the switch on top of the radio (one symbol=telephone, the other is "Y" shaped). Any assistance is greatly appreciated. Thanks in advance!
Steve KC6IJM

I have a Swan 500 for sale. The rig is about a 7 1/2 on the 1-10 scale. The faceplate is clean with one scratch. Here's the status: The receiver is working on all bands and the VFO tunes nicely. The band switch must be a little dirty as the VFO will jump a bit as you start to change bands. The finals are dead so I can not attest to the transmit part except to say that in the tune position it does put a few watts out. I've cleaned it up it appears that it had been sitting for quite a while due to the dust accumulation in the rig. I'd normally keep it and restore it but have other projects going. Includes the power supply. I suppose I can post a photo if interested, but don't have one handy.

$195 and I'll pay the shipping from Rochester Hills, MI

Question concerning Motorola MX-300S series Secure (DES/DVP) radios:

Can a DES module be swapped with a DVP module in a secure capable MX series radio? I was just curious if the radios used a common main board and the DES/DVP connector pins were the same. Thanks in advance for your help!

Kenwood TS-930SAT with all of the Fox Tango filters.
2 500hz CW and 2.1khz SSB filters. It still has the
original crystal filters to allow very crisp audio.
This is done with the IRCI filter switch kit.
The radio was updated by Kenwood and had the super
alignment by IRCI. I also have the remote tuning knob that allows the
vfo to be controlled next to the keyboard. I have a shipping box, the
owner,
and service manuals.
Asking $1000 + shipping

Icom IC-765 with the stock filters. I have a SM-20
desk mike as well. I have the original box as well as the shipping box.
I have a home brew rs-232 control interface. It has been tested with
CT, NA, TR & LOGPLUS.
Asking $1200 + shipping

Reason for selling, want to upgrade to FT-1000

We have for sale (1) Kenwood TS-440S/AT radio for sale. We are asking $600US. The radio is in 8.5-9/10 condition with only minor scuffs on the top of the unit.

Has spent most of its life in the box (was for a project that never got off the ground).

Comes with original packaging, user's manual, and hand microphone.

The radio has had the extended TX modification done.

For more information check out the web page below.

Remove the capital letters from the reply email address (NOSPAM).

Thanks!

Here's what I got. No price is set in stone, I'm sure I'm probably off base with some of it :) If I am, I'm sure you'll be more than happy to "inform" me otherwise :)

Computer (most of it): Cyrix P200+, Otto mainboard (specs on request), 3.5 floppy, Enlight Mid-Tower AT 250W case, new ATI Xpert98 3D/2D accelerator card, new 16bit/3D Yamaha 719 sound card, new 3 button mouse. No harddrive, CD-Rom or ram. $400.00

R/S HTX-212 2m mobile (I think most are familiar with this one :) $150.00
TrippLite PR-12 12A Power Supply 9ACont.-12A ICS. Used for above radio. $65.00
Cushcraft AR-2 2m Ringo Vertical antenna, great for attics only 3.9' tall $30.00
Arrow Antenna 2m 3 element beam w/ Magnavox LD rotor. In attic too. $70.00
Yaesu FT-2500M 2m mobile w/ optional CTCSS board. $225.00 Nice radio!
Diamond SG-7500NMO 2m/70cm 3.5/6.0 dB mobile antenna with nmo large magnet mount. $55.00 This antenna rocks!
Bencher BY1 Iambic paddle with MFJ 407C keyer, I purchased both as demos from HRO less than 6 months ago. $65.00 for paddles, $50.00 for keyer or $105.00 for both.
R.L.Drake TV3300LP 1kw filter. $15.00
R/S Digital Sound Level Meter. $40.00 This ones for the audiophiles :)
R/S Gordon West Learning Morse Code cassettes $10.00
R/S Benchtop Digital Multimeter (new from warranty replacement) $75.00 Specs on request.
Lowrance X-65 fishfinder with speed/temp sensor (still shrinkwrapped). $250.00
Oh almost forgot, a 486SX25 (yes pathetic I know) processor only. $15.00 obo

Still digging around so keep an eye out :)

For Sale:

Yaesu FT736r S/N: 61060120 with:

Standard:

* 144 MHz & 440 MHz
* Operator's Manual & Schematic Diagrams

Options Included:

* 50 MHz module (<-= Work the world!)
* CW keyer filter (Internal / Installed w/manual)
* FIF-232C CAT System Computer Interface (External / Included w/manual)
* FTS-8 CTCSS (Internal / Installed w/manual)
* WinTrak Pro Satellite Tracking Software for Win 95/98/NT! (<-= Serious Stuff Here!)
* Semi Auto Bencher Key included! (<-= WOW!)
* 150 QSL cards designed just for you! (<-= Cool! see below!)

This radio is a GEMSTONE for VHF Weak Signal Work! Satillite/SSB/CW ready. I worked my 6m VUCC (#980) in less than 6 months with this radio. And that was barefoot too! I have received fantastic signal reports from this rig with the majority at 59's! My 6m computer log has been well posted on the Internet at:

http://www3.sympatico.ca/the.hiltner.family/6m-log.htm (needs some updating for Feb99! Hi Hi!).

Very Clean & respected unit (Lets face it, its my "second wife"!, so my XYL says! (HEY!, at least my wife KNOWS where I'm at!)). A great contest radio to say the least! And with Sun Cycle #23 on the rise, you can top my radio accomplishments! 6m Sure is grand!

And if your new at VHF Work, and don't have any QSL's (or you just want a change from the standard QSL you may already have...), I can help you out. I will make you a nice run of your own QSL cards! I enjoy doing this for other HAM's! Designed my own QSL Card! Get the best reviews on the backs of my replied QSL's (QSL TNX).

Selling price:

$1,500.00 USD (Will NOT brake up this package deal!)
or
$1,750.00 USD I will include my Mirage A1015g 150w Brick! (Rigged for Auto Detect Switching!) and comes with a spare Pre-Amp transistor too! (only 6 months young!)

I will ship (Drive) the Toronto / Ottawa / Montreal corridor. (lunch @
Wendy's)
Would also consider Buffalo / Rochester / Syracuse for a nice spring drive.
(lunch & a tank fill).

My address & Phone number are listed below.

I have two transmitters, one on 6 meters and one on 2 meters, for my repeater under construction. I will be using a dual-band repeater antenna and need to find out if I need a transmitter combiner or would a duplexer, such as the kind used with multi-band transceivers, work?

Thank you,
Christopher Zeman, KB9RHA

I am happy to say that the Icom 706, 746, and 756 discussion groups are doing well. This all started with the Icom 706 group. The 706 group was a great success and users ask about a 746 and 756 users group. So, I put one on-line for all to use.

If you have a need for one of these groups I invite you to stop by and take a look. There is a great deal of useful conversation taking place on these sites.

http://vartel.com/icom706
http://vartel.com/icom746
http://vartel.com/icom756

Also there is the Tradersnet which is doing fair. I would like to see more traffic there so please visit that site as well.

I'm looking for the best "value" in a simple and rugged yet effective 144 /
440 rig to move between my vehicles.

I don't need fancy stuff like detachable faceplates.

Small, solid and inexpensive is better.

Any suggestions?

73s....

You know Ken, unwarranted slander like this is ruining the net. You could have posted a message on the swap group to my attention and I would have answered. Yes I did change internet providers.... and as a result have a new e-mail address. Yes I was going to buy the SB-104A, but decided not to at this time. I did send you e-mail, I gather you did not get it. I have had a number postings here with my new e-mail address, if you were so concerned, why did you not reply to one of my postings to ask me about the deal? If everybody up here whined the way you are everytime somebody changed their mind, there would be not room for for-sale messages. That's why, you don't ship til you get the cash. Why would you even post this drivel when you lost nothing? I dunno Ken, seems like you are crying about nothing... give the world a break will ya...

That's great! Service with a smile...

Sounds like Ken may be on
to something. He said that you would not do something you
committed to doing. You admitted he was correct. Then you bash
him.

I have the following 2 scanners for sale

1 - Uniden Bearcat SC150 800MHz scanner, twin turbo, used but in good shape. 100

channels, no modifications done. Unit has a date code of 'OFIG' first $105 obo takes it

1 - RS Pro-2039 Base scanner. Very small and in great shape. 200 channel, 800MHz

HYPERSCAN. Broken antenna top, but functions fine and has optional BNC antenna connector on back. Unit is 120VAC ready with cord. Asking $125 obo

I have a number of mint condition Black & White CCD cameras. Follow the below link toview . They are very small encased C-mount cameras(I have some lenses for sale as well) They were purchased new for $249 each. I
will sell for $150 each, or can work out a deal for qty. Let me know if interested

275. Nice, clean Tempo One for sale

Newsgroup: rec.radio.amateur.swap
Date: 1999-03-09 00:00:00 UTC
From: Tom KA4RKT <badger@telalink.net>
Message-ID: <2d9F2.436$sz1.1398647@news4.atl>
Source record: 8616
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.swap

I recently ended up with a Tempo One in very good condition, but
it is surplus to my needs. After receiving the unit, I gave it a good
going over, and it is very clean, nearly in "out of the box" condition
(except for a few items, outlined below) The receive works well,
there is power out, and a clean signal, according to my IFR-1500.
Physically very clean but a bit of dust, has all original tubes, it
appears and comes with manual (tattered, but all there) and an
equally nice looking power supply and a hand mic. It also has
surprisingly little drift for a Tempo One, was able to copy 40
meter SSB without having to retune after a 15 minute warmup.
(Better than my old Swan 350!)

The caveat -- it was owned by a CB'er who changed the xtals out
in the 10 meter band segment, all 4 (5??) crystals. There are
NO OTHER mods to the unit, luckily, that I was able to find.
The next problem was it was delivered by UPS, who decided the
front of the radio would be a convenient part of the box to bang
against some hard object. The dial thusly has a mild wobble
and a bit of binding, and a small piece of the dial trim is missing.
This should be easy to fix, and I can do it if the buyer wishes
before I ship. With original tubes it could probably use a new
pair of outputs.

The price? Well, it is in good shape despite all this, there are no
dents, dings, or rust and has been well taken care of even though
it was used on (ugh!) 11 meters. Would make a decent/passable
first rig or backup rig, if the ten meter crystals are replaced
(Available via JAN crystal and others, I am told)

$150 shipped from Nashville, TN 37211 or best resonable offer.
Trades considered. No laughing please. :-)

73

I am a new Ham and in need of a rig.

I am interest in any radio a No-code tech would be able to use.

I have the following stuff that I am willing to trade for a rig. The
fianc&#65533;e gave me the cabash on buying a rig straight out (something about
spending the money on the wedding instead, or other such non-sense :)

Thanks

1975 Ford Full size Van
460 Engine Runs Well, minor body rust, paint job needs more work, needs new tires, could use new shocks, one break rotor for sure needs replacement. Would make a good tow vehicle, has full tow package including break control. Could use re-wiring from the ignition to the starter relay.

Laptop Acer 760Ic
486DX50 8Megs Memory(upgradable to 24Megs), 200Meg HD(user replaceable), color display, track ball (could use a new one/can be replaced by user), NO SOUND, or CD-ROM. Needs new battery, current one does not hold charge at all.

Beepwear Pager - Life Style (Black with Yellow style)
In new condition, just traded with pager company.
Has Flex-time, 16 alpha message slots, 3 News slots.
WWW.BEEPWEAR.COM

Multiple video cards
Multiple Modems from 9600-33.6
(33.6 = Mwav by IBM voice mail, etc.)

Small color TV
Radio shack 2 or so inch TV. Minor scratches, barely noticeable.

Mac IICX with a 68040 Daystar Card. Works fine, could use a bigger HD (200 Meg included) and a FD (Does not have a floppy drive at all, was used on network). Older machine, so not in perfect cosmetic shape, nothing major.

Linksys PCI Network card, never been used. Was bought as a set with HUB etc. My main machine is PCI the other two are not. Was still cheaper to buy the set and then buy a ISA card, PCI card, hub, cables.

150 Watt 4 Ch Mosfet Radio Shack amp for car stereos. Works great, I no longer need due to my new head unit puts out 50 Watts per channel, and I really do not need that much power in a smaller car. I used it when I drove my van regularly. It has standard RCA inputs as well as High level inputs. All cables are standard and available at Radio Shack.

Cell Phone stuff
One 550 works fine, High hours.

One older Alpha (does not have CID, etc.), works fine, extreme hours

One flipless flip. Works fine, could use a new attenna, high hours. has built in charger, comes with transformer for.

One ultra Lite II (had minor soldering problem, which I had fixed by Motorola, does have CID, check with carrier to see if they support) Booster kit for Lite II, one spring on the lock down mech. is broken, still works fine. Comes with handsfree. I used it a lot before I bought the Star Tac.

I do have a couple a batteries for these phones as well, one intelicharger, one standard, one slim.

Selling Ham Gear for Taxes! Prices are cash pick-up in Vista, N. San Diego County,
CA, else payment in advance by U.S.Postal Service Money Order, and will split cost
of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email
frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with
the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah
battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic,
MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC Adapter, CSC-V10 Cordura
Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip,
VC-23 VOX Headset,
and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio
never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $225

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz
good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz
With TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital
display needs adjusting so as to be able to read from above display. Reads
fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum
carrying case, Kenwood TM-231A excellent condition, Toshiba

1000
(286) Laptop computer (12Volt) with extra battery, AC
charger/DC adapter
and installed packet software, KPC-3 TNC with V6.0 rom. All
cables
configured and working - $435

(8) Kenwood TM-331A 220MHz mobile, excellent condition - $315

(9) Alinco DR-600 2Mtr/70Cm mobile, good condition - $350

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade,
Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery
Case,
PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A 2mtr/70cm HT with manual, BP-175 Hi Cap Battery, BP-170
AA Battery Case, good condition, few key markings worn off -
$175

(12) Azden PCS-7500H 6 mtr FM Mobile with DTMF pad speaker mic.
Excellent condition - $265

(13) Portable 4 Band HT + Scanner Station: Comes with custom
configured
Aluminum carrying case with cut-out foam lining, wired for 12
vdc to each
HT and scanner position. Case opens to configure as operating
stand and
an external 12VDC power source (battery, powersupply, ??) plugs
in to rear
of case, powering all radios and scanner. Included in case
accessories are a
digital multimeter, BNC antenna adapters, battery clamps with
cable for external
case plug, small set of basic tools, 2 BNC to PL-259 coax
cables and BNC to
external suction cup glass antenna mount with coax cable.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX,
SMC-32
Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah
battery, PB-13
7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery,
charger, SMC-30
speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod
antenna (and
'rubber duck"), 2 BP-11A battery packs, BC-26 AC
adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz,
806-999.9875MHz,
external speaker, 12 to 9vdc adapter (built into case),
and 2 AA battery packs

Case is designed so that when configured, all radios stand
vertical in their respective
case cut-outs, and operate from the case's 12vdc power
(external) or can easily be
individually removed for operation outside of the case/stand.
All radios are in excellent
condition, as well as the Pro-43 scanner. Would prefer local
pick-up so that you can see
the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include
NIB RS 2mtr 35 watt amp
(12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz
amp (also 12vdc)
in the deal.

I would appreciate it, if you think my prices are too high, that you
don't consider buying.
Let's not waste each other's time. Serious inquiries only please. If
calling, turn on your caller
ID (*82 usually) if it is not normally on. My answering system will
not accept calls from
blocked caller ID telephones. If using email, I'm sure the "group"
would appreciate email to
my address, not a post to the newsgroup. Thank you for your
consideration.

Selling Ham Gear for Taxes! Prices are cash pick-up in Vista, N. San Diego County, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $225

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz
With TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital display needs adjusting so as to be able to read from above display. Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-231A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A 220MHz mobile, excellent condition - $315

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying. Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller ID (*82 usually) if it is not normally on. My answering system will not accept calls from blocked caller ID telephones. If using email, I'm sure the "group" would appreciate email to my address, not a post to the newsgroup. Thank you for your consideration.

294. Wanted: Squires Sanders SS-1R receiver

I have a mixed set through these years that was spoken for but the deal fell through. They are:

1947 - 4,6,10
1948 - 1
1950 - 2,3,6,7,8,10,11
1953 - 2,4,7,8
1955 - 2,6,7,8,9,11

All 21 issues for $18 shipped CONUS

regards,
Chuck...K1KW

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Prices is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

Was just advised that the TM-261 was selling for $179 (thanks Cliff),
and I've just verified a selling price of $199 at Jun's Electronics in
L.A.

Accordingly, the new price for the subject radio is now $165.

73 to all interested parties...

Frank

Oh boy, the price police are out again, hide the women and kids.

Say, do you guys have badges, or just busybodies?

If you don't like the price, don't buy it! Easy, huh?

Wow, does that bring back memories. I was 16 years old, and working part time at a grocery store when I ran into a fellow that owned the TX, RX and Band Scope. He was getting ready to move out of state, and was willing to sell. I was working diligently to purchase said same, when that fateful day came and someone else bought it out from under me. Such is life...

For those of you who have never seen this setup, it was the greatest looking groupings of equipment. Loved that electric QSY'er. One button instant dial spin.

Good luck guys.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $165 (I've received such flames about this one that I feel compelled to answer a couple of the best...No, the radio did not belong to Elvis, but to a little old lady who only used it to check into the Sunday morning ARES net! / No, I do not expect you to buy the radio if you don't think the price is fair; I expect you to act as a responsible adult...)
* Thanks to all who have read!

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-241A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A (SOLD)

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying. Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller ID (*82 usually) if it is not normally on. My answering system will not accept calls from *blocked* caller ID telephones. It will from "Out of Area" If using email, I'm sure the "group" would appreciate email to my address, not a post to the newsgroup. Thank you for your consideration.

Hello,
I am considering the purchase of a IC-2710 with the MB-65 and MB-58 options. How tall of a mount is the MB-65? Is it comparible to a standard cell-phone cradle mount? I'm wondering if it's tall enough to be easily viewed when mounted on the center hump of my dodge pickup. Any information / suggestions will be greatly appreciated. Please respond directly to peaster@connors.cc.ok.us.

Thanks & 73's
Mike Peaster

If you search on amateur radio slow scan I believe that
you will discover that you can do slow scan essentially
free.

There is some freeware out there that will allow you to do
slow scan through your Soundblaster sound card ...
or so I am told.

Sure would appreciate you sharing what you learn ...

335. FS: Kenwood TK-806

Newsgroup: rec.radio.amateur.swap
Date: 1999-03-19 00:00:00 UTC
From: TVSJR@SPRYNET.COM
Message-ID: <7cu96t$i5u$1@nnrp1.dejanews.com>
Source record: 8676
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.commercial-lmr,rec.radio.lmr-commercial

For sale:

I have for sale eight Kenwood Tk-806 commercial/LMR radios. I have three radios which are working (tested tx and rx, carrier, pl, and dpl on both band edges) and five with various problems. I'm sure that the non-working five could be put together to make two or three good, working radios, but I don't want to worry with it. These radios are UHF, 470-490 split (I have been told that they will work 460-500, no guarantees on this though!) and 16 channels. They are very similar in function to a Motorola GM-300, with a few differences. (Couldn't find a pic, sorry...) The first difference is the size. The radios are roughly 5.5" wide x 6.5" deep x 1.5" tall. Second, the radios have an orange-backlit quasi-alpha display (eg Ch 1-Ch 16). Each channel set to repeat has a talkaround which is selectable by a single button (changing the display to Ta 1-Ta 16). Also, the front panel has a second button for monitor/open squelch, power push-on/push-off switch, volume control, scan, scan list delete/add (it's very easy to reprogram the scan in these) and REC for option boards such as DTMF decoding and tone signalling options, as well as the RJ-type mic connector and the channel-selector knob. The radios are at least 30 watts out within their bandsplit- I can't remember the exact figure but they may be up to 45 watts.These radios also support hang-up functions, programmable scan timings, TPL/DPL/InvDPL, etc.

Anyway, I would like to sell these radios as a lot. I think that $300 each for the working radios and $250 for all five of the dead ones is fair- total $1150. I think that this price is fair; if you don't, make an offer.

NOTE: I do not read these newsgroups. PLEASE E-MAIL ME AT TVSJR@SPRYNET.COM!!!!!!

Thanks
Terry

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug,

small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Checked it but it also is too high, starting at $590.00.
They 735's regularly go for 400-450 here in W7 land.
You can't fault a guy for trying though.

379. Portable ARES/RACES Station: 3 HT's (4 bands)+Pro-43 Scanner+accessories

Newsgroup: rec.radio.amateur.swap
Date: 1999-03-23 00:00:00 UTC
From: Frank - KE6WOE <frankl@home.com>
Message-ID: <36F7C55A.863DB7DC@home.com>
Source record: 8572
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, + $10 towards cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

Yes . No Problem. Just place it carefully behind a truck wheel and back up. Thats all theres to it. Easy Huh?? Try it. Im sure youll be pleased with the results.
You can repaint later after you give it a test on the 10 meter AMATEUR BAND where you need a license. If you had a license you would know how to do this simple feat.

Now wait a minute, Dean. Before you go off the deep end you have to realize a few things here. Paul probably has never heard any UT0 stations on his local VHF repeater, so you have to excuse his ignorance.

With the 400,000 Indonesian, Filipino, Chinese, and South American CB'ers we have on ten meters now, one more 5 watt signal will do permanent damage to the E layer and ten meters will never work again.

And you have to realize that Paul probably was a CB'er before he got his ham license, so it's his job as a duly licensed amateur radio operator to condem anyone associated with 11 meters in order to squelch any thoughts that maybe he used to operate there....

Finally, Dean, you have to realize that Paul doesn't realize that the CB'ers all over the ten meter band are using Kenwood, Icom, and Yaesu radios and 'export models' of good buddy stuff, so few of them are converting anything to become a pain in the neck.

Or maybe Paul is just like he is because somebody backed up over him with a truck.

And to our friend, UT0IY, yes, you can convert old 11 meter radios to ten meters, but how to do it is very dependent on the type of radio. The old one I converted required crystals be changed, some of the new ones don't. Post the model of the radio you have and maybe we can help you find out how to do it....

Paul, such a rude response!

But the apology speaks well of your character--most would not have had the courage to type it. Let's see if we can help this guy (or his radio sport club) out in simple English:

Okay Vostok-Radio, the conversion involves changing the reference crystal in the phase-lock-loop (PLL) circuit to the part you are interested in moving to in 10M. In North America, most AM activity is 29.000 to 29.100 MHz, sideband is from 28.300 on up to 28.700 or so. You can also frequency shift the carrier and operate in the FM portion of 10M from 29.400 to 29.700, but this is a slightly harder modification unless you have one of those FM CB radios that are built for overseas markets. A company named Melco used to offer a kit to make an FM conversion of an AM CB radio that was pretty easy to do. After the PLL's xtal is changed the reference voltage must be adjusted. Harder to figure out is the band-pass filter that comes after these oscillators. The new frequency will be attenuated if this is not changed. Usually it involves just changing a simple capacitor or inductor or two.

The hard part to all of this is understanding the theory behind PLL's and in finding a circuit diagram (schematic) since they are not usually published by the manufacturers and there are so many different models that have been sold. There is a CB web page that sells service manuals for CB repairmen that may help. Try

http://www.cbcintl.com

or just keep asking on these newsgroups if you have more specifics of the circuit you are working on. In the 1970's an American magazine called '73' published many articles on CB conversions. I'm afraid that I am not going to be much help. It has been 15 years since I did my last conversion and I cannot even find my notes.

If you are going to operate illegally, be sure to work from 27.5 to 28.3 MHz, always overmodulate, add echo effects if you can, and try to speak a very fast Spanish or Portuguese so that you blend in with the other operators I usually hear there. Just kidding!

Good luck,

-- John (N0BUP)

I'm curious to as which CB's would make the best subjects for conversion. I know that it would be better to get one w/SSB (who does work w/AM?), but I'm more curious about what models work best. After, why pay $100-200 for a real 10m radio when, if I spend $20 bucks for an old cb and do $10 worth of mods, I can have something that does the trick?

I agree it was a bit of a premature reaction but if you don't want to be a
ham why read the newsgroups and listen to us on the air?

Paul,

UT0IY may well be a valid call sign. Looking at the QRZ New DX page at http://www.qrz.com/wrad/directory.cgi?new_dx I find a couple other UT prefixes listed. I also find in the 5th edition of the ARRL Operating Manual (ch. 17, pg. 90) that the prefix UT indicates someplace in the Ukraine, specifically Kiev.

I'm not up on searching for non-US call signs online. I've no way of confirming that UT0IY is valid or not - but it sure looks like it may be, but of what class/type - I don't know.

Now if this poster had indicated he was some yak-jawed 'good buddy' I'd have to totally agree with your suggestion. In this case though, methinks you've keyed up before listening.

I can understand all responces made to the request unknowingly Paul did not reconize the sorce of the ?,
we do have a problem with the cb's getting used wrong and there is no easy fix. Howevever the mods are easily done by a ham or anybody else that gets the info in the future why not deliver the info to a lic. ham via email and not public display it may only keep one radio from being modified for the wrong reason but it is a start.

I am looking for a reliable 2m all-mode rig w/mic and manual.
Must be 100% operational. Minor cosmetic blemishes OK.

Have to trade all of the following:

1. Alinco DJ-S11 -- pocket 2m HT w/sma swivel mod to allow
for a better antenna, as well as mobile antennas
and/or an amp. Nice. In original box w/manual.
2. Radio Shack HTX-202 in original box w/battery, manual, etc. Nice.
3. Radio Shack HTX-404 in original box w/battery, manual, etc. Nice.
4. Shure 450T desk mic as-new in box w/manual
5. D-104 mic w/amplified base (needs a little cleaning and tinkering)
6. Kenwood TR-7200G 2m mobile w/original manual. Nice.
7. Motorola Mitrek 2m range rig w/control head, mic & cable harness
Model # CT43JJA3900A (needs cleanup and mic needs cord and plug)
8. GAP Titan vertical (needs work)

If a local pickup (Southern NH/Central MA) will throw in Panasonic
KX-P1124 mono printer and Citizen GSX-220 color printer.

I aquired a Swan 350 with a 117CX power supply some time ago. It was originally intended for my father, but we picked him up a Swan 500 instead. So, I don't really have any use for the radio, nice as it is.

I tuned it up tonight on 20 meters and was able to get around 200 watts out of the finals, and I didn't even have the load maxed out.

The reciever in this radio is of some of the best quality I have heard. I was surpised as to how sensitive it is.

But, alas, I am entirely too lazy to tune up this rig each time I want to use it. I much prefer to just turn on my Kenwood TS-450 and just operate. :-)

The condition of the rig is an 8.5 out of 10. The power supply is not in a speaker enclosure, so you'd have to add your own speaker. But the cables and connectors are in very good shape.

I don't know what this radio is really worth, so I would appreciate offers from those seriously interrested.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice)
with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $115

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(7) Complete Portable Packet Station: (SOLD)

(8) Kenwood TM-331A (SOLD)

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as

operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

The correct procedure is to preface your ad with FA instead of FS. Then
those who do not care for Ebay can ignore the ad..

Stromberg Carlson CCT-46077 HF Receiver. 2 to 20 MHz. Serial 62. Model RBM 4. Operator's log has entries for CBC, Japan, and the Netherlands.

The scant information I have found says the unit is AM and CW only, but the control panel indicates a couple more modes.

I have turned the unit on (I have a home brew power supply) and verified that it powers up, but I don't have an antenna to verify that it receives. I did get some noise from the headphones which seems to indicate that it is working.

I've tried to find out what the unit is worth, but have been unable to find anyone selling them. I'm asking $200, but am open to offers.

Purchaser responsible for S/H from San Jose, CA. Money order is preferred, check is acceptable but I'll ship after it clears.

Contact me at andersom@pacbell.net

431. FS: Swan 350 HF Rig and 117CX power supply $175

Newsgroup: rec.radio.amateur.swap
Date: 1999-03-30 00:00:00 UTC
From: kg8o@getridofit.cars.org
Message-ID: <kg8o-3003991324340001@38.240.229.69>
Source record: 8524
Cross-posted to: cle.forsale,rec.radio.swap,rec.ham-radio.swap,rec.radio.amateur.swap

Forsale:

Swan 350 and 117CX power supply. I acquired this rig about 1 year ago and have not really used it that much. It works, and works well. I was just able to tune up the rig on 20 meters to over 200 watts into my beam. The 117CX power supply does not have the attached speaker or enclosure.

I have had a couple people express some interrest and even make an offer ot two. Since I have not heard back from them, I'm opening it up again and this time I have set a price at $175 plus the buyer pays shipping costs.

This is a real nice radio, for new ham or old timer alike. It has some of the best audio quality I have ever heard on a reciever, even better than my solid state rig.

I think the price is set rather nicely, as I am not interrested in dragging this out for too long.

$175 plus shipping.

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, + $10 towards cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

I have a RCI-2950 that I'd like to use for 10m mobile.
It has some problems (bought it that way) and I need to
troubleshoot.

I thought a couple of GIF's I downloaded would get it done
but they had been poorly scanned and are missing large
sections of circuitry.

Scanned schematics are fine, otherwise will pay reasonable
copy and postage as agreed in advance.

Thanks!

Near mint 160-10 Meter transceiver with digital display, CW filter, operator and service manuals. Very low hours...it still has the original final tubes. No problems, a few documented reversable mods added from Kenwood and QST hints and kinks. Two BNC connectors added on back to allow external reciever. Asking $350. Local pickup in the Detroit MI area preferred. I am the second owner (non smoker) and have had it since early eighties.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V
600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery,

PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Forsale:

Diamond CR627NMOB 6m/2m/70cm mobile antenna
Gain: 2.15 db on 6m
4.5 db on 2m
7.2 db on 70cm
Capacity: 150 Watts
Length: 60 inches

Diamond K601NMO hide-away trunk mount
Black
6.5 ft. RG316 Teflon coax w/PL-259.

Both are less than 1 year old (bought at Dayton last year) and in great shape. Antenna is a top notch performer and the hide-away trunk mount keeps the antenna secure when away from your vehicle and out of the weather.

$140 for both (save $30 from NEW prices) and split shipping from 44125

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, + $10 towards cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

Thanks for reading this message. I am looking for information
from someone who has bought something on the news group
from an individual living in Canada. What are the import duties
or tariffs if any imposed by the US customs? I sure would hate to
buy this radio and find out that there is a 50% or more tariff on the thing!
I have not found a clear answer on the 'net.

Thanks,
Randy KB8ASO Milan, IN.

A lot of government agencies have web sites with all sorts of
information. Have you tried finding a web site for the U.S. Customs
Service?

Randy:

If you live in the US and are purchasing something in Canada, only US customs may impose duties on your purchase. If the product is made in the US or if it's value us less than $50US, you will have not problems and to my knowledge, no duties will be charged. If it is not either of the above, they will asses a tax based on what it is (ie 5% or the such). You should check with them concerning this. I'm not sure on this, but there may be brokerage fees charged by the shipper to move it across the border.

I bought a music synthesizer last year for $300 USD, I think I paid $15 shipping for 10# and U.S. Customs charged a $30 tarif and there was a $25 fee from a broker or someone like that. I wouldn't bother doing it again unless its really a rare item.

I think you'll find that items for PERSONAL use do NOT require a broker.
UPS, however, assumes that EVERYTHING is commercial, so they feed things
thru a broker. For 30 bucks or so. Use the post office. Check with FEDEX, as
they may be more friendly, but at higher transport rates. There is a publication
put out
by U.S. Customs, outlining the rules. Be careful in following the rules.
Also be conscious that things like scanners that can receive cellular frequencies
can
be considered to be contraband, under U.S. law. /mark

Hello,
Name is Bud I have e-mailed you once before how far are you from the East Brunswick area I have not lived in N.J. very long and don't my way around yet I might like to take a look at the power supply.
Thanks
Bud.

It is my understanding that there is an exemption of some type for amateur radio equipment purchased for personal use (not resale). It's been a while and I don't remember the details but I purchased a PTC-II from SCS in Germany for $900 plus and was not accessed any import duties on it.

the below listed repeater needs a 70cm motorola mobile duplexer.
it only runs 25 watts output on 70cm so it's a good match.
quite awhile ago, someone was selling them for $50 but no contact.
anyone out there care to help out the machine.
thanks for your time.

Prices are cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker
Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355 (Sale in progress)

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX,

SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Many of us up here will decline to make a purchase from the US if they insist on
using UPS for just that reason.
I got ding $145 brokerage on a $600 item once. I have found the US postal service
to be one of the best ways
to get stuff accross the 49th parallel.

This does not apply to amateur radio equipment. There's NO duty on ham equipment. Otherwise for all other stuff there's Duty about 5-10% and taxes about 7-8%. Then if you use a broker it cost even more. If they think you claimed too low they can appraise it for you at a using some rediculous method. If they catch you tring to hide it in a car they can impound the car and charge you double duty and taxes to get your item back or it goes to auction. Remember to mark whatever you are sending clearly "AMATEUR RADIO EQUIPMENT" 73 Chris

I'm looking for an S-100 bus modem. Yes, honest, S-100 bus, 300 baud modem.
I want to add it to an S-100 bus system I have and add one to my display
wall at work where I have a number of S-100 items. Any S-100 bus modem you
may have in that box of wires in the shack. I'll buy it from ya. I'd also
be interested in an acoustic modem (coupler) if you have one of those.
Please reply to me directly at chipsndips@snet.net.
Thanks.

Alan

So what's the point? Undesirables are going to find were you live from an
nationwide ISP account and show up at your home?

Does not make sense to me as long as one does not give out an address or
send someone money who will defraud them.

Ivan Ivanovich

There are many reasons. Perhaps some people don't like to advertise to
the whole world who they are and the fact they own valuable,
easy-to-steal, radio gear. Remember, these posts are accessible by
millions worldwide, for virtually forever. A few people reading them
might be less scrupulous than the average honest citizen.

Nice rig. I used to run one. It is an All mode General coverage solid state HF base rig. All the bells and wistles you could get on a rig 10 or so years ago. 100 watts except 40 on AM and FM if I remember correclty. Had space in the back to insert modules for 6and2 meters and 440 mhz. Nice setup if you had all three modules. I only had 2 meters and 440 but I loved it. The only reason I sold it is I'm not a serious enough ham to keep that much invested in a toy.

Quantity of 10 New NiCd battery packs at Ebay. to find the auction first go here:

http://cgi3.ebay.com/aw-cgi/eBayISAPI.dll?ViewListedItems&userid=boatman9&sort=3&since=-1&page=1&rows=0

then select the auction hyper-link for the batteries.

These are Mitsubishi cellular telephone battery packs. Each pack contains five (5) size AA Nickel Cadmium rechargeable batteries. These are rated by the manufacturer at 850 MilliAmp hours. Since each cell is nominally 1.2 volts the entire pack is a 6 volts. These packs can be used by soldering onto the terminals or you can cut them open and remove the cells for use individually.

Connection to a digital camera can be made by soldering a small power cord onto the battery's positive and negative terminals and then attach the correct plug for your camera on the other end of the cord. Since the batteries are 850 mAH the correct charge rate is 85 MilliAmp for 14 to 16 hours. If you use the batteries individually you can simply charge them using an ordinary AA NiCd charger.

You get 10 of these packs for one price.

Of course any local with a scanner can usually get the same information by listening to normal 2M ragchewing and nets....and these people live right down the road.

There are many reasons to "hide".
I get net access as a perk with my job.
Last year I nearly got fired and/or lost my "net" access due to the
unholly amount of spam that one little post brought.
If anyone really wants to spend the time, they could almost certainly
track me down. Any police agency would have no trouble "backtracking",
but the spammers are not that resosurcefull. Yet!
So, to any and all that dislike me hiding, tood bad, it is not going to
cange. It is either this, or lurk only.
And I like to think that I have at least a little to contribute.

I have several available.

Both UHF and VHF to choose from. They are all very clean, and power up and receive nicely.

Package includes radio, power cord, microphone, and mounting bracket.

These radios are two channels with PL installed. One channel is active - the other is empty. Currently in the 151 Mhz area for VHF, and 453 area for the UHF.

$25.00 per VHF radio, and $35.00 per UHF radio - Plus $10.00 USPS Priority Mail shipping - shipping discount for multiple radio purchases.

If you have any interest in these radios - please let me know ASAP.

Thanks for your time...

I just bought a Yaesu FT100 from AES.
First impression of the radio was good. Works great on HF (40M and 75M
)
I entered some local repeater frequencies and scanned for awhile. When
the radio stopped on a couple of repeaters, I noticed that the signal
strength was less than half of what I had gotten on other radios hooked
up to the same antenna (Comet dual band ground plane @ 70" on top of
tower).
Repeaters that normally were full scale are now S-9 on the FT100. I
looked all through the menu to see if I had some attenuation on but
there is no way to attenuate the receiver on 2M. I also read all through
the manual, but did not find anything on changing the sensitivity of the
receiver on VHF. The receiver on VHF and UHF is very dead. My wife was
about 200 yards down the street in her mobile (50 Watts) and I was
only getting 40 over S-9, the signal should have been FULL SCALE and
then some.

Has anyone else experienced this problem wit the FT100's receiver ?
I plan on calling Yaesu tomorrow about the dead receive on the radio.

Thanks in advance,

Jim N5JIM

I'd like to trade my 1965 Cobra Cam 88 tube type, 24 channels. (One of the few early units that came with an extra channel).

Recently gone over electronically, although the chassis is a bit gooey and needs a good cleaning. Will go base or mobile with included power cords and mounting brackets. Has original hand held microphone, but sounds great with a
TUG8-D104. The channel knob is not original, but you'd
never know it if I hadn't told you. (blends in real well with the scheme). A few minor blemishes in the brushed aluminum face. Also the S-Meter is a replacement....
It is exactly the same size as the original, but it is black face rather than white face. Has fine tune, squelch, PA/CB, and "Dyna-Boost", (or speech
compression).

I'd like to trade for a nice chrome Vibroplex paddle or similar. I'll entertain all ideas, including swapping for a repair job on my Hallicrafters
SX-24. It needs the four section electrolytic cap in the power supply replaced, and possibly a new choke which I think is what took out the cap to begin with. I have a schematic to go with it, but I'm not talented enough to fix it.

Please email Cary at cfries@tic.bisman.com.

Regards,

Cary Fries

Not sure why this is on the "swap" grp, but I was surprised at the good sensitivity on 2M with my FT-100. I'm getting clear reception on repeaters that are usually scratchy sounding. Don't have 440 ant. to try but County EMS (450.xxx) comes in just like scanner using 2m ant. HF works great too. DSP is very impressive, now if I only had smaller fingers or the FT-100 had bigger buttons it would make a nice base rig (which is what I am using it for.)

Do you think that the S meter reading is more not accurate on uhf/vhf and
the radio still has fantastic
sensitivity?
If you inject a calibrated signal into the antenna port and do a 12db sinad
test, then I we could put more
faith in these comments.
How about at least having someone driving out to the fringe signal areas
and compare which radio has the best
ability to pull the signal out of the noise floor?
I have never felt any of my VHF/UHF radios had more than a relative signal
strength meter.
The Quality of the directional couplers and RSSI calibrations are more in
question to me.
Let me know your thoughts Joe?
I enjoy the intent of finding all the faults in the FT-100.
I see Yeasu has been responsive in complaints, and aims to please so far.
I think it is keeping it's head above the water quite well so far.
I will wait out another month or so before I purchase.
Jack

The reason I posted this on this newsgroup is because this newsgroup is read by a large group of hams each day, and I thought that I would have a better chance of maybe finding what was going on with the FT100 that I bought. I am so sorry for any inconvenience that this post may have caused you. I am glad to hear that you are not having any problems with your FT100. It is so funny when I see responses to posts about problems that people are having with their radio. Some people take it personally when they read about defects pertaining to a radio that they have. They act like you are talking about their child or something.

The fact remains that I have a serious problem with the receiver on the FT100 that I purchased. I have received many emails from FT100 owners, and none have had this problem. The dead receiver on VHF and UHF does not seem to be a defect with other FT100s. If not for the receiver problem, the FT100 seems to be a neat little radio. I am shipping it back today to get the problem taken care of.

I have called Yaesu and they feel that there is a problem with this radio.
After reading many emails from other FT100 owners, I feel that this is not a problem with other Ft100s.
I have done numerous tests with the radio.
I have keyed my HT in the house, sitting directly under the tower. Transmitting 500mw from the ht's rubber duck antenna, the FT100's meter read S-9+10, transmitting 1 watt from HT, the FT100 displayed S-9+40, When I transmitted 5 watts from the HT, the FT100 finally showed full scale (S-9+60). The meter should have been full scale at this distance with 1/2 watt.
I also was talking to my wife in her car. She has a 50 watt mobile. She was transmitting full power about 3 miles away on simplex (146.54mhz). The FT100's meter was reading S-3 to S-7 with a lot of static. Even when she was less that a mile from the house, the meter on the FT100 was still just S-9+20.
It is not just the low S-Meter reading. The receiver is also very attenuated. There is static and white noise on repeaters that are full scale and full quiet on other radios that I have had hooked up to the same antenna.

For Sale:

A 1965 Cobra Cam88 CB, has the old channel which was referred to as "B", but which was actually channel 24. The rig has recently been gone through to the tune of well over $150.00. The chassis looks a little gooey to me and could use some cleaning up.
The channel knob is not the original, but it fits in very nicely with the scheme of things...you'd never know Otherwise. The S-Meter is a replacement, however it is EXACTLY the same size as the original except with a black face. The brushed aluminum face has a few minor flaws....nothing too terible. All the lettering is very good.
Comes with original Mic; from what I can gather, it is an Astatic hand held contracted by B/K, Output is near 4 watts. Modulation is very nice with a Tug8-D104.....punchy yet mellow. It has built in switchable speech compression; Cobra calls it "Dyna-Boost". It has power cords for both 13.8 VDC and 110 AC,

Also, I have a 1960 or 1961 Demco Power modulator. It's essentially a two tube preamp for use between the mic and mic input. I suspect that there is some collectablity factor here. It's missing the two tubes, and I'll be damned if I know what they are. I'm sure a Riders book could settle the score quickly. I can assure you this unit was working properly before I decided to salavage the tubes in all my pubescent pomposity. (duh) It'll need the proper amphenol mic connectors to be useable.

Also, I have a Cobra SR 900 16 channel scanner in fair cosmetic condition with with three preset NOAA freqs. It's operated from a 12 volt power adapter. It has an external antenna output Obviously, this is a primitive item, and might be good for the casual listener. I'll throw in the last two items if we can come to terms on a mutually satisfactory deal.

For Sale: Uniden pro 500B 40 channel CB. This is a gimme too.....I'll make you a great package deal. (I think it was 40.00 new!)

Now for something completley different, any call for THESE odd balls? I have two mint woofers for the JBL Model 4401 Control Monitor speakers. They appear to be 51/2" from surround to surround, or 61/2" from one end of the brushed aluminum frame to the other. The speakers are mint with heavy magnets, rubber surrounds, and white cones. These origianlly served in radio monitor
duty, but the moronic jocks insisted on driving the weasely amp just past the point of distortion and subsequently turned the tweets to toast. You can have them naked, or I can ship with the cabinets, your choice. The cabinets are in pretty fair shape.

If you'd like to know more, Please email me cfries@ tic.bisman.com

I have several VHF and UHF Motorola Maxar radios for sale.

The VHF radios are 25 watt radios. All radios are two (2) channels; and come complete with radio, mic, heavy duty locking bracket, and power cord.

You will need to purchase the crystals for your favorite frequencies, and have the radios tuned to your specs.

Radios do include a PL reed, already installed.

VHF radios are $25.00 + $10.00 shipping.
UHF radios are $35.00 + $10.00 shipping.

Shipping is USPS Priority Mail. Radios are in great condition.

Going fast, but still several left. Respond to hutch@jerrylee.com for immediate shipment.

Thanks,

Eric - N8XHP

Without trying to sound obnoxious, I might not corss post to areas that
would have little interest.

Good luck

The subject line says it all. A photo copy will do. PLEASE
NO $20.00 manuals!
The counter is probably not worth $20.00 when working! (:'>

Thanks for your kind attention.
Randy KB8ASO Milan, IN.

Do you just want a schematic for interest sake, or are you trying to
repair it?

Those date from 1976 and there isn't anything special about the circuitry.
I found an ad for them in the February 1976 issue of 73, but it doesn't
give much detail. There was a review of a Hufco counter some time later
in 73, but mine are not organized well enough to be able to find the
article easily.

It's going to use a chain og 7490's to divide down the timebase, and a
7490 BCD counter/(maybe a latch, a 7475)/decoder per digit. There is
nothing magical about that, and there really is only a set way to connect
them up so you can easily get the details from all kinds of articles zbout
building frequency counters. The only unique circuitry would be the input
circuit and the rewet circuits.

The January 1976 issue of 73 has an article by Jim Huffman titled "A $50
Self-Powered Counter". It's an almost pocket size unit. It has three
digits and a switch to see the rest of the decimal places. It shows the
input circuitry, which is a 40673 MOSFET feeding a 7413 Schmitt trigger.
I'm not looiing it up, but that's what was used in the K2OAW frequency
counter which appeared in a multi-part article in 73 in 1972. I suppose
there might be slight component variations. It gives some more details,
but it's pretty much some stringing together of some module like circuit
boards that the company made.

The February 1976 issue of 73 has another article by Jim Huffman, "What do
You Want to Count?" It sort of goes into the explanation of those
"modules". There's a three digit counting board, and on it each digit has
a 7490 counter, a 7447 decoder and a 7-segment LED readout. It doesn't
bother with a latch. There's another IC at the bottom of the board which
I can't read, but a schematic for the board shows a 7400.

So if nobody comes up with the schematic, the question becomes: "What's inside?". Is it one whole board, or "modules"? What IC's are on the board? Unless the reference frequency comes from the AC line (it's been done!), there will be a crystal oscillator and a chain of 7490's to divide it down, and they will all be wired up the same way, since they are all dividing by ten.

The display units are going to be something like the above and layout itself will show a pattern. If it's a bad readout, you look up the decoder IC and see whether it's meant for common anode or common cathode, and then buy a new one. The pinout may be the same, but you can verify by the wiring on the circuit board, since the decoder is a known absolute.

The input circuitry may require some tracing, but if it's got a MOSFET and a 7413, chances are he used the K2OAW input circuitry, and you jast have to verify the match.

Another popular input circuitry came from a commercial frequency counter and when QST reviewed it, must have been 1972, they showed the circuitry. From there, it showed up in plenty of the frequency counter articles of the time. It was an FET and bipolar transistor buffer capacitor coupled to a 7404 with the first or the first two stages set for linear operation via a feedback resistor. I mention the circuit since it was popular and it might have possibly shown up in the Hufco counter.

If the reference chain is not working (you can check it by figuring out the dividing ratio and hooking an audio amplifier to a low frequency output (the 7490 data sheet will give you the proper pin) for a tone. Try a different crystal (anything in the same range will give you an indication, and if there's still no tone, then inject another oscillator into the input of the first 7490 (such as from one of those crystal oscillators in a metal can that fit a 14pin dip socket). You'll have to figure your other schemes if still nothing comes out; but since they are digital IC's they will either be working or not.

The reset circuitry may be the most difficult since there are all kinds of ways of doing it. On the other hand, if there are no latches the circuit will be even simpler than most that were published.

The counter may look complicated, because of the number of IC's, but most of the wiring is repetitive. Once you've figure out one digit, the rest will be the same.

Of course, if you've got a blank board this may not be too helpful, unless the IC numbers are silk screened on the board. If it's just a blank board, you'd do well to forget it. Not because it's too much trouble to build a frequency counter with such small scale integration IC's, but becuase it used straight 74xx series TTL that used a lot of current and didn't have very high frequency range and you could do it simpler today with better integrated logic, and more likely CMOS or Schottky.

Motorola Radius VHF GM900 Mobile. Model number M01KHK9AN3AN.
136-178MHz, 16 channels, with
5-tone signalling. Cosmetically it is a 10/10. Transmits,
receives, and appears to work just fine, but it is sold as is.
No mounting bracket, power cable or mic included (uses standard
Radius power cable and mic). Will have
programmed before shipping if required. Buyers must prepay with an
Internationally Negotiable money order in
US funds. Buyer pays actual shipping and insurance costs.

Need to check the steering diodes in the BC BPF for leakage. Quite often
the case with sets that have
had an open antenna attached while exposed to wind static, nearby
lightning, or transmitting into the
receiver, inadvertantly, of course. The latter usually takes the shunt and
some of the attenuator with it though. I think the other dude was trying
to say "things that do many things, can't do one thing well."
While there may be some truth to that statement, I find it hard to beleive
that the R&D team would
overlook any image, conversion mixing, or overload products that would
land(at least) in the amateur bands.

I'm just wondering how you can say the SWR meter is EXACTLY the same but black face, not white like the original?!?!?!?! Then ask yourself this.....can it REALLY be EXACTLY the same?

Good Morning, Mr. Steven S. Weber:

I suggest the following:

#1) Go back and read the original post. Did I say "SWR Meter", as you say, or did I say S-METER. In the event you didn't know, they are usually two different items.

2) Go back and read the original post again, dolt! I DID NOT say they were Identical.
I DID say however, that they were of identical SIZE. WHICH I STAND BEHIND!!!!

3) Ask yourself if there is something productive you could be doing, rather than picking your nose and picking apart IMAGINED discrepancies in other individual's posts.

4) Have a wonderful day, moron.

On Ebay: Click here for more info -->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=97558259

T-195 Military Transmitters, Package of 2
Designed by Collins Radio, the T-195 is often found paired with the R392 receiver. An exceptionally heavy-duty transmitter, the T-195 is both waterproof and shockproof. By using two car batteries in series, the transmitter is perfect for vehicle use, or as a field day transmitter.

This package includes 2 of these transmitters. Both are in very good condition. As per most "de-milled" equipment, the meters have been removed. They have been replaced in one of the units. One unit makes full RF output; the other seems to have a problem with the Auto-Tune mech. I understand from Electric Radio that often these problems are a result of poor connections on the modules.

This heavy-duty transmitter covers 1.5-20MHz continuous. RF Power output is a solid 80-100W with nice sounding plate modulated AM. Emission modes are AM and CW.

Frequency coverage is in 4 bands using a Collins PTO. The unit features antenna Auto-Tuning, with two choices of antenna connections depending on feedpoint impedance.

Final tube uses a 4X150D, and 2-4X150D are used as modulators.

Dimensions are 11.5h X 22w X 14.25d. Weight is 135 lbs. Power requirement is 28VDC 42amps.

Due to the weight, the buyer must pick up in the Buffalo, NY area, or arrange pickup, crating and shipping at his/her cost.

Payment must be received in Postal Money Order, or Bank Check prior to shipping.

As always if you have any questions just email.

Tnx

73,

Bruce KG2IC

I have need of a good power supply transformer for the Hallicrafters PS-2000 (for the SR-2000 Xcvr). If transformer good, will naturally consider buying parts unit. If you have either, pls advise details/price/general location/etc. Naturally, a direct/better substitute with documentation/specs can be considered.
Thanks
dan

Model 23-25-220
Input voltage: 95-->130, or 175-->235, or 190-->260
Input Amps max: 23.2/12.6/11.6, dependent on input voltage strapping
Output: 120 or 240 volts at 2000VA (yes, two thousand!) max

For more info go to http://www.newark.com/C115_modules/3847.html

The model I have for sale is no longer made but it's very similar to Newark p/n 46F3371 (except for support of 480V). Please see the Newark page for details on regulation and isolation. This thing is much too heavy to ship, sorry but only local sales will be considered (I live roughly halfway between Chicago and Milwaukee, near Six Flags).

The nearest equivalent current model is over $1,500; mine can be yours for five hundred. It's in great shape and guaranteed healthy.

Thanks for taking the time to read this,
Carl Van Camp

Have the following Linear AMP parts for sale, will not split up, all or nothing:

1: Peter Dahl plate transformer: Primary: 115/230 VAC Secondary: 1250 VAC @ 1.5 Amp CCS (this produces 3100 VDC under load in a voltage doubler supply - It's a big puppy!)

8: 1500uf @450V Computer Grade Filter Caps

2: 4CX1500b Eimac Tetrodes (good medical pulls)

1: 7.0V @ 15A(?) filament xformer (will have to be dropped down to 6.0V to use with the 4CX1500b)

1: Socket for 4CX1500b

1: Dual Squirel Cage blower fan for cooling, good pull from military equipment.

1: Copies of several plans for linears that use the 4CX1500b (including Collins linear)

Asking $400.00 + shipping for the lot.

Message-ID: <7gm0et$e7f$1@nnrp1.dejanews.com>
Source record: 8365
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

WARNING ! The QST review of both the 706 and 706MKII identified a full power 100 watt spike at the start of reduced power transmissions. These should be used with EXTREME caution unless you want to fry the input circuit of your amp !! It is NOT as cut and dry as he portrays.

IC706 AMPLIFIER INTERFACE

My new ICOM IC 706 amplifier interface plugs into the accessory connector on the rear of the 706 and provides a phono jack to which you can connect a cable to your amplifier relay. The interface can key any amplifier with DC antenna relays (the only one I'm aware of with an AC relay is a Collins 30L1 and I'm not sure there's) any problem with that either!). The interface incorporates a reed relay with a 250VDC 1 amp contact rating. Only $29. plus $3 S&H

Order from Jack Schuster, W1WEF, 408 Thompson St, Glastonbury, CT 06033

The GLA-1000B uses four tubes in the final. When the 6LQ6/6JE6's go bad,
you can retro them into Svetlana EL-509's. I've done a few.

Ouch another testy tester.

Son, if you read my post I made no doubt about your quality. I raised the RF spike to spare others burned amps,especially solid state amps not rated for an input power of 100 watts. Is that OK with you ?

Gee-- isn't that a "standard" Icom "feature"? The 781 does this too.
Makes it tough to run low drive ceramic tube based amps.

AEA HF Antenna Analyzer

This is one of the best antenna testing units to come along in years. With it's digital readout, and ability to sweep a range of frequencies, antenna condition, SWR, feedpoint impedance, and losses can be determined in seconds.
Has output for capture on computer serial port (cable included!) for logging and monitoring antenna installations over time. Unit works perfectly and has seen little use.

Complete with carrying case, manuals, computer control cable and paperwork.

Payment must be received in certified funds or Postal Money Order prior to shippment. Buyer to pay shipping costs, your choice UPS or FedEX.

Tnx http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=98990222

I have finished with my final update on the items we will be taking to Dayton. Please be sure to read the info at the top of the page if you are interested in purchasing an item(s). If you emailed me about and item and I have not replied, it may be because I accidently deleted the message because of the large amount of replies or because the item is sold. I have marked all items that have been sold on the site. Hope to see everyone at the hamfest. Once again, the site address is:

http://www-personal.umich.edu/~robbinsm/heathkit.htm

Thanks,
Matt

Actually I've seen used ones on this list for $100, but far and few
between. I have this radio myself and like it very much.
Good Luck.

National FB-7XA in excellent condition, the black wrinkle paint is perfect,
no scratches, dents, or corrosion inside or out. This has the crystal
filter
and comes with the FB-7 doghouse supply and the following OSC and
DET coils: 80M, 40M, 20M, 10M, Bands "A" and "C" . The matching
power supply is also in excellent shape. The only imperfection is a hole
drilled
on the right hand side of the cabinet near the bottom.
$495 plus shipping.
regards,
Chuck...K1KW

I see, Tony. Techamericas website it pretty nice, but the search
engine for finding anything is poor at best. They do have the DJ-C5.
Here's how to find it: Go to techamerica.com. From their homepage,
click on "online catalog". The screen you get next will be a tab
labeled "Online Catalog". Page down this tab to catagories and click
on "communications". The next screen will also have alist of catagories,
click on "amateur radio". Next screen: click "transceivers-handheld"
The first items listed are Standard radios. Page down to the 12th
item..."2m/440mhz credit card HT"...this is the Alinco DJ-C5T. They
have it for $159.95. Cheers,
Nate KL3NPIn article <7h77om$rk49@hpbs1500.boi.hp.com>,

Bought used last year, cleaned the traps and elements, but never did put it
together. (Decided it would dwarf my little crackerbox Cape...) Appears to
be in good shape - elements straight, etc., with manual.
Boxed for shipping (but it's heavy).

$175 pick-up or will deliver within 50 miles of Providence, RI.
$225 shipped CONUS.

Tnx and 73
Gil

I am in need of an rlc-2A for my UHF repeater if you have one that you want to move to upgrade to something else please E-mail. I need at least the controler and rack mount cabinent. if you have the auto-patch option I would be interested but its not a must. dont need DVR stuff. I have the firmware update for the unit. just send E-mail as to what you have and we can go from there.

10M is OPEN! Get in on the fun and work DX from your car!

Enjoy 10M FM on your Kenwood 742 or 642. UT-28 module for 742/642. Very easy to install in your radio. Only a small 10M antenna (can use a converted CB antenna) needed.

BRAND NEW in the box. A rare find. Not available from the factory any longer.

I have TWO of these (one for you and one for a buddy?).

$250 EACH or both for $450 + ship.

Credit cards OK
e-mail or 800 995-2929

684. Hallicrafters S-20 (not S-20R) for Sale!

Newsgroup: rec.radio.amateur.swap
Date: 1999-05-17 00:00:00 UTC
From: Nate <apollo@cnjweb.com>
Message-ID: <37406A29.FD919BD9@cnjweb.com>
Source record: 8277
Cross-posted to: rec.radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.swap

Great condition, works quite well. (5 foot wire brings in all the big'ns and quite a bit of small'ns as well. The AVC still works, and the BFO is nice & clean.)

This radio is quite collectable, very cool looking, esp. at night when dial scale is lit up. Both dials are still in good shape. The silkscreen dial scale is in good condition, and is surprisingly accurate when calibrated to WWV.

Will sell for $125 and I will split the shipping, which in the CONUS should be around $20-30. (hence the term 'boatanchors'.)

e-mail for further info.

Nate Gingras, KB9LSX

685. FS: NEW 23 AMP 13.8 VDC power supplies cheap!

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched at 200-260 VAC
50/60 Hz.
Available for a limited time at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

> Thanks!!

I'm kinda partial to the VX5-R. I bought one a couple of weeks ago and
cannot put it down. The small size and the 5 watt output were big sellers
for me. I'm burnt out on packet, so that wasn't an issue. I also like the
ability to program the radio as I like it using either ADMS or EVE software.
It does a good job even on AM broadcast and the SW bands with a good
antenna. It is am amazing little radio given its' size.

Dan

I have a BRAND NEW Eimac 5CX1500A

Stored at HENRY RADIO. Tube has been tested and works perfectly.
While it has been plugged in and tested, it has ZERO hours on it.
Ted Henry will verify this.

$295 + ship

Pay with credit card and be safe. Guaranteeed good tube with full output.

Techamerica price is $119.95!!

Call them and see!

My Price is very fair at $95 for the 23AMP Samlex power supply (3 pounds,
very small).

I see many "price police" out here with incorrect info.

Yes, I do think you price is fair! HRO is a little better. I for one am glad their is a "price police" out their provided they are correct. If I am buying it helps me to make an informed purchase. If I am selling it keeps me honest and fair.

So to all those "price police" thanks!!!!! Keep up the good work!

Although I have no preference of the two radios you listed, they both will
work for packet radio, at least at speeds of 1200bps.

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

$350 including shipping UPS CONUS.

Yes, it's the latest and smallest dual band mobile ever made.
BRAND NEW in BOX.
Full warranty. Same as if you bought at your local ham store only cheaper!
Just won it at my local radio club raffle tonight and don't have a need for
it myself.

$360 including shipping to lower 48.
Only ONE.
First confirmed e-mail or phone call at 310 821-5244 (call ONLY between
9AM-9PM California time)

Which direction do the radios face when all 6 are plugged in? If they face forward how long is the charger? If they stack like dominos, what is the length and width?

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched for 200-260 VAC
50/60 Hz.
Available while I still have a few left at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

513A "Q" standard, 249uH, in the felt lined Boonton mahogony box
with application instructions. Looks excellent, almost new. $20

4 standard inductors, Model 103A for the following frequency ranges:
.8 to 2 MC - 100uH
1.5 to 4.5 MC - 25 uH
5 to 14 MC - 2.5 uH
20 to 35 MC - .5 uH
$10 each

3 older style standard inductors, silver plated cases
50 to 150KC - 22.5 mH
4.8 to 17.5MC - 2.44 uH
14.2 to 50 MC - .28 uH
$5 each

$70 shipped for all of them. If you want less, then indicated price
plus shipping.

regards,
Chuck...

Small town Volunteer Fire and EMS looking for a VHF repeater. Old communications tower moved further away forcing us to look for solutions. As our budget is small to none, any donations of equipment would be appreciated and subject to tax write off. All other offers are welcome. Thanks.

Guys, guys, guys, simply look on the back cover of the HRO catalog. OR
better yet, go to www.search.com or www.altavista.com and type in FT90.
I found several places that show a picture of this new radio. I find it hard
to believe that you haven't tried a search engine yet...

FREE! FREE! FREE! FREE! FREE!

The Cuyahoga Amateur Radio Society is offering a free service to the ham radio community to post no-fee items for auction. Auctions can last from 1 to 14 days, can contain reserve prices, and will automatically extend the auction for 5 minutes after the last bid. Posting is FREE!

We also are offering a free classified ad service. Again, posting is free to the ham radio community. Advertisiments to the classifieds do not expire, however, if you sell your item, it would be appreciated if you delete the ad.

The ONLY restriction is that items must be of general interrest to the ham radio community.

These services are NEW as of now, so there is little posted. Please post and tell others about it!

Find the auction at http://www.cars.org/auction

Find the classifieds at http://www.cars.org/classifieds

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=109038256

The Swan 350's, no doubt one of Swan's most popular series of transceivers. I bought this radio because it was sold together with a Swan 500. I've decided to keep the 500 for my father and sell this 350.

Comes with a Swan hand mike, Swan 117 power supply, manual (copy) and an external Realistic speaker.

I have fired it up and have made contacts with it on SSB. My watt meter shows in excess of 200 peak watts output on SSB.

MFJ1270C TNC - This tnc was bought for a packet node and was never used. Has been on air about 15 minutes. Manual included $75.00 shipped.

MFJ1278 Multimode TNC- I used this tnc on my home packet station for aprrox 7 years. Does have scratches on top cover where radio sat. Manual included. This model does not include pactor mode. $100.00 shipped.

Butch kd3yt@penn.com

732. FS: Sell or Trade Hallicrafters SX-100

Newsgroup: rec.radio.amateur.swap
Date: 1999-05-26 00:00:00 UTC
From: DavidC <davidc@bit-net.com>
Message-ID: <7ii14vket1@news2.bit-net.com>
Source record: 8225
Cross-posted to:
alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.swap

I have a SX-100 with all but one of the main tuning
knobs original. Generally works fine, though the BFO
is a little iffy. Tuning mechanics are fine.

The calibrator case has been replaced with a new box
and the stem of the pitch control has been broken and a
piece welded on and a brass coupling added to which the
knob attaches. (looks OK but a little wobbly -- needs some
adjustment)

The cabinet is a mess. Two corners have suffered serious
denting and sloppy patching, another corner has bad chipping.
The top half of the front panel was repainted a non-original
sorta-close color and the surface was not well prepared.
The cover is intact but was painted a too-glossy sorta-close
silver.

The receiver looks fine from a distance (other than the obvious
non-original knob ... as you get closer the flaws begin to show.
(No, I didn't do any of the damage or any of the repairs.)

I have $70. in this (long story) and will sell it as a parts or
restoration rig or trade it for a Multi-Elmac PMR-7 in good
shape with a 6m converter (perhaps an old Ameco).
Note: I am looking for a compact boatanchor receiver
to match my Gonset Commander (160-6m AM/CW).

Thanks! & 73, DavidC K1YP@qsl.net or 603-894-1174

I have two KaGOLD software for the Kantronics TNCs. For PC computers WIN 95/98, 3.xx, DOS, OS/2, (NO MAC!).
This is absolutely THE best software for all digital modes. I use this software myself on the KAM TNC.
AMTOR, PACTOR, G-TOR, RTTY, CW. Single port or full dual port support.
This is the version WITH PACTOR.
Too many features to list them all here.
Version 9. NEW, you are the first owner and user and you use the registration card. SEALED box.
Normally $99.95 + ship.

$68 DELIVERED price each.
I have two available.
Note: I also have one PkGOLD, same as above but for AEA TNCs, also $75 delivered.

I have one PkGOLD software for the AEA TNCs. For PC computers WIN 95/98,
3.xx, DOS, OS/2, (NO MAC!).
This is absolutely THE best software for all digital modes. I use the
Kantronics version myself on the KAM TNC.
AMTOR, PACTOR, G-TOR, RTTY, CW. Single port or full dual port support.
This is the version WITH PACTOR.
Too many features to list them all here.
Version 9. NEW, you are the first owner and user and you use the
registration card. SEALED box.

$68 DELIVERED price
I have two available.
Note: I also have two KaGOLD, same as above but for Kantronics TNCs, also
$68 each delivered.

HENRY 2K Classic X at ebay with low reserve!
See http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=110233287
New this amp has a HENRY list of $2695
Used these amps normally sell for $1600-2000.
Reserve on this amp is MUCH LOWER!
80-10 Meters (including WARC bands), pair of 3-500Z tubes, THE strongest power supply and RF deck for a pair of 3-500 tubes. Roller inductor tank (PI-L) for the ultimate in efficiency and tuning. EASILY loafs at 1500 watts in SSB/CW even RTTY!

Here's your chance to own a fully factory checked out and guaranteed HENRY for less.

I have an HDR300 Hy-Gain rotor that was up and not turned for a few years.
It is complete and looks nice inside. The control box looks very nice.
I did have to hacksaw the bracket on the shaft of the rotor partially to
remove the plate. The same bracket can be used as little damage was done to
it.
I have NOT plugged this in to see if it works.
I am selling this as-is but probably all Ok. It was used VERY little. this
was the rotor up at HENRY Radio store in West LA and not turned often.
This was the KING of rotors just a few years ago (over $1000).
$175 for the both rotor and control box. Plus shipping.
Credit cards OK

745. FS: Moto 42-50 MHz Max Trac 80 watts!

Newsgroup: rec.radio.amateur.swap
Date: 1999-05-28 00:00:00 UTC
From: Radiodan W7RF <RFpower@radiodan.com>
Message-ID: <wSL33.313$DI2.191@cynws01.we.mediaone.net>
Source record: 8147
Cross-posted to: alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

I have a good condition and working Motorola Max Trac 100 mobile radio in the 42-50 MHz range. 2 channels.
Model # D51MJA93A5AK WITH serial number perfectly readable. Presently on 48.5 MHz, receive is <.2uv.
It measures 80 watts out on my service monitor.
With mounting bracket, short power cable, mic

$225 shipped to lower 48. I know this is a rare radio in the 42-50 MHz range, so first e-mail or call at 310 821-5244 (call only between 9AM-9PM PDT) gets it

I do NOT have software and CANNOT program for you. I do not know if it will go outside of the specified 42-50 MHz range. YOU determine suitability yourself before you buy.

Looking for an IC-706 MKII with DSP or the IC-706 MKIIG

Must be a full or partial trade for something from my site.

Take a peek at www.radiodan.com and www.radiodan.com/hamindex.htm
Need something I don't have on my site? Maybe I've got it or can get it.

I have TWO UT-28 modules that are NEW in BOX.
These will get you on 10M from your car with your Kenwood 742 or 642 triband radio.
Get one for you and one for a buddy and have a contest to see who works more on 10M on your drive home!
$225 each + ship or $400 for both + ship.

Credit cards OK

Hello,
Anyone have the new log-eqf v 9 yet? I was looking for a copy to try out but it was not at log-eqf site yet. Also I have version does anyone have the modules
for DXCC WAS and WAZ for version 8. I would like to check this out also.
Thanks!!

Steve,

For $49.95, you can check out version 9 all you want and you will not have to copy anyone registered disks.

I got version 9 at Dayton and like Tom's earlier versions, Version 9 is works great!

I have Version 8 and have been asking for some of the things in 9 ever since
I got it. I looked at the ad and am singularly unimpressed. It is still a
dos program and still has no variable length or user configurable fields.

My opinion is

For contest use NOTHING beats Troll
For General Logging NOTHING beats Logic 5.

For me, that is what I will stick with.

I have the new version 9. of Log-EQF. Best logging program I have ever used.
To get a complete working version only costs 35.00 and the complete Rig-EQF is
only 20.00. Well worth the really low price. Not fair to steal a man's
creation from him.

I have been chosen by my Radio Club (WARC) to buy our next new HF radio for
the club station at the WLA Veterans Administration Red Cross site.

I can spend $750 for a good used TS-570.

I MAY consider other late model HF radios. MUST have a radio that runs on 12
VDC, built in antenna tuner, less than 5 years old.
I know what a good deal is, no need to offer a TS-440 for $800!

We're in no hurry.....

I have a nice Kenwood TS850SAT that I traded for from Murray on
rec.radio.swap. I have it listed for $975.00 plus shipping but I will
sell it to you for your radio club for $875.00 and I will pay shipping
to you. I will even take one of your SP-8 speakers that matches my 920
in trade.
I have the box, book, mike and dc cord. It is a 9+ . But it is probly
over 5 years old. I did not see that in your email till I had already
typed down to here. :-)
Catch ya later

1 1/2 year old Icom Icom 756 HF and 6 meter transceiver. With internal
antenna tuner. Has the optional voice module installed.

MARS/CAP mods professionally done.

Unit is like new, with no scratches or damage. Functions 100% like new rig.
Complete with all paperwork, manuals, and original box.

Reason for selling, I do mostly AM activity on older boatanchor gear.
Located in Buffalo, NY, you can stop by for inspection if desired.

Will professionally pack and ship anywhere in the United States.

$1600.00 + UPS shipping to your postal code.

Image and specs of transceiver on the Icom site
http://www.icomamerica.com/amateur/hf/IC-756.html

Any questions just email.

Tnx

Kenwood TH28A 2 Meter HT

Transmit 144-148 MHZ
Receive 136-173 MHZ

This unit is also dual band receive - It receive the 440 band and may
be used as a crossband repeater - receive on 440 and transmit on
2 Meters.

Have HT, battery pack, wall charger, alkaline battery case, 12 volt
power cord, manual and original box.

The unit has a flexible antenna, not the original solid rubber duck.
The antenna works great with the unit.

$125.00 shipped.

Butch kd3yt@penn.com

Get on 10M and have lots of fun! Use you Kenwood 641/642/741/742 radio. This module fits inside as the "third" band.
Model UT-28S.
Sunspots are still on the rise and you will have terrific propagation on 10M for at least the next 4 years!

I have two of these BRAND NEW in the box! Never used or installed.

$225 each or both for $400 + ship.
Credit cards OK!

I have the following gear for sale. Purchased from a business that is no longer using it. Will consider offers starting at $200, shipping extra (Orange County, California).

2 HT90 (NHN6326A), Jun 83/Jan 85
1 HT440 (NHN6325A) Jun 84
2 Mobile Microphones (HMN1017A)
3 HT Desk Chargers (NLN7493A)
2 HT Holsters
1 Mobile Speaker
1 Desk Microphone (HMN1027A)
2 Mobile Radios Maxar 50 (one Model D24JAA6000A, other larger, can not read label)
1 Power Supply for Base Station (HPN1004A) 14.2vdc
2 Mobile Mounting Brackets (HLN4609A)
Mobile antenna and coax with mount

Currently the HTs are set (crystalled) for TX 466.450 and RX 461.450. Presumably the mobile units are the same.

Contact via email: hlassiter@usa.net

821. EQUIPMENT COVERS--WHERE TO BUY ????

HF Antenna Tuner, very heavy duty

Click here for link ->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=115299903

Antenna Tuner (Transmatch)

HF Antenna Tuner. Homebrew, but better than commercial quality. Built with broadcast transmitter parts. Vacuum variable caps, and large roller inductor. Unit is housed in black instrument case, about 19" wide and 12" in depth.
Range: Covers 160-10 meters, will match a very wide range of loads. Tuning is not limited to the amateur frequencies as inductor and caps are not fixed, continuously variable.

Features: Turns counters on both vacuum variable capacitors, using the tuning/loading mechanism of a T-368 transmitter. Roller inductor, also with turns counter, is operated by motor with gearbox, using front panel momentary contact switches. Indicator light shows motor operation. Tuner can be bypassed via relay using front panel switch. Indicator shows tuner in/out condition. Front panel Power meter shows both forward and reflected power using internal bridge unit. Meter range is adjustable using front panel mounted potentiometer. Unit runs off 110vac, and is supplied with 3-wire line cord. Front panel is low gloss black with white control lettering.

Construction: QRO away! RF connections are mounted on the rear bulkhead using SO-239 jacks. Builder of the unit claims power handing capability of 5000 watts, and looking at the construction of the unit, liberal use of heavy strapping and broadcast quality components, I believe it. This unit makes the MFJ, Palstar and Nye tuners look like QRP.

Use: Was used with my T-368 for over 1 year, working flawlessly. I have seen many antenna tuners, amateur, commercial and military, and none have the heavy-duty constitution of this unit.

Any questions, just email!

Tnx

You go to the local fabric store and buy a remnant for $1. A few snips with
a pair of scissors and short time on the sewing machine and it's done.....
and they all color coordinate with your shack.

YES, I do it myself! The XYL's too busy working to feed me.

Is there anyone out there who could make a copy of their Kenwood
950SDX schematic for me ??? I will gladly pay any duplicating &
postage costs involved. I just bought a used 950, and the schematic
evidently is not part of the instruction manual, but is separate. If
you have a scanner, you could scan it as a gif, and E-mail it to me if
it is easier to do that. Also, any operating tips ??? The instruction
manual is quite complex---maybe one of you have some good tips.

Thanks in advance,

RON....KA2IIA

Hello Everyone,

I just wanted to drop a few names of some guys I have dealt with over the past few months who have been a real pleasure to deal with. The deal went through smoothly with lots of communication between parties and the parties involved were real gentlemen. I have dealt with these guys on the newsgroups and/or the For Sale/Swap mailing list at forsale-swap@qth.net.

These GOOD GUYS are:

W2KL - Louis Bocchetti
KA1SRD - Edward Rauer
KD1UX - Glenn Pike
KJ5NO - Brian Horst
KF2GG - Richard Schneider
N2KXX - Kevin Francis
N9KHI - Marc Mallett
W2TGP - Clifford Priebe
(call unknown) - Tony from Tony's Equipment

Thanks guys, it was a pleasure doing business with you.

73, Piero - N3FVG

Ron,

Your equipment is for AUCTION, not for SALE and your subject prefix should be FA instead of FS. There are a lot of reasons for this and I'm sure there are a thousand readers out there who can explain them to you.

Cheers,
Rick

Hi All,

I recently bought a used Kenwood TS950SDX. I am missing a few
items that one of you might have. I am missing the RM-1 Keypad. The
recording & playback feature cannot be accessed without this (The
DRU-2 was already installed). If you have one of these to sell, please
E-mail me.

Also, in the accessory list on page 6 of the instruction
manual, there are a few things listed that possibly one of you 950SDX
owners could scan, and E-mail to me. They are:

Control location sticker
External control instruction manual
Menu key display list

Thanx & 73,

RON.....KA2IIA

I have a T-368 transmitter for sale.

Unit is in good cosmetic and electrical condition. Complete with extra mod deck. Speech amp and exciter included.

Transmitter is mounted on miltary rolling cradle that will go with the unit.

Has new power cable, and blower switch mod. Nice mid power AM transmitter, 4-400 in the final, modulated by a pair of 4-125A.

Bulletproof, mil-spec contruction designed for 24/7 service.

Runs off 120vac, RF power output 450-500 watts. Coverage from AM broadcast to 20MC.

$1250 for local pickup in Buffalo, NY.

Details on these transmitters can be found on my website.

865. WTB: Eddystone 830 and 850 receivers

Newsgroup: rec.radio.amateur.swap
Date: 1999-06-21 00:00:00 UTC
From: McAllister Bryant <bryantm1@us.ibm.com>
Message-ID: <7kmj42$1nqc$1@rtpnews.raleigh.ibm.com>
Source record: 8058
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.shortwave,rec.radio.swap

Now that my questions are answered (well most of them), I am looking for an Eddystone 830 - SW and an 850 - LW receiver. Please email with what you might have and what you are asking for it. I would like radios that are in working order and look good and correct. I would also be interested in a 770R in similar condition.

I am located in the Hudson Valley and am willing to drive several hundred miles for the right radios (including some parts of Canada). It gives me a chance to enjoy a day without work and avoid shipping a 50 pound radio.

Sorry for the crossposting but not everyone receives some of the newsgroups.

Thanks

M Bryant

873. ULS: FCC allowed to collect your phone number /e-mail and publish it

Newsgroup: rec.radio.amateur.swap
Date: 1999-06-24 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7ks944qed1@nnrp1.deja.com>
Source record: 8066
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.amateur.space

The ham part of ULS which requests your e-mail address, the usual info, plus your SSN or TIN and YOUR PHONE NUMBER is due to start in August says lamb to the slaughter ARRL. FCC is out of control.

Let's ignore government abuses, because paranoid is the usual ignorant reponse of most morons.

A hacker can get your bank info if you use direct deposit for any government checks (like that Social Security all you retirees like), will have your e-mail to infect you wth e-mail viruses, etc.

Think it can't happen ?

If the FBI, State and Defense are being defaced once a week for a month, they'll steal your private data just as easily.

Why does FCC need your phone number, when they have your addrss ? That's absurd ! Furthermore, now your phone number and e-mail will be, without your say-so, public, if you want your license.

Try the online form; no phone number, no filing !

How about the thousands of old or disabled or low income people who will need to comply ? They won't have internet connections. What a way to thin out the technologically behind hams ! FCC says sign-up on paper; why ? if you can't derive any benefits to begin with ?

> HERE IT IS !!! CHOOSE YOUR UNLISTED PHONE NUMBER OR YOUR HAM LICENSE.
>
> In addition, all information provided in this form, except Taxpayer
> Identification Number, will be available for public inspection. If you do
> not provide the information we request on the form, the FCC may delay
> processing of your application or may return your application without
> action.

They say they have this right because they need the info to collect revenue. Where are the license fees then ? Most people don't have vanity calls ! There goes that rationale.

Plus, they need your phone number ? Why ? When the Coast Guard gets fake distres calls 9 times an hour because of the unlicensed service ? Why are we to be cataloged more closely than the life-or-death marine radio service ?

Plus, now for the first time in the history of the ARS, if someone doesn't like what you have to say, even an SWL, well, heck, they can just look you up and give you a PHONE CALL...

This is off-topic in 'rec.radio.amateur.space' (and for that matter, all of the other newsgroups originally specified). 'rec.radio.amateur.misc' and perhaps 'rec.radio.amateur.policy' would be the correct newsgroups to (re)post this to.

If you want to respond to this posting, please delete 'rec.radio.amateur.space' from the newsgroups you are posting to. If you don't know how to do this, then please do not respond to the original posting. Thank you.

I would like to invite you to http://hfradio.org - my hobby website, where I am gathering radio resources together for the general public. My Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

(We just did field day as NW7US -- we had a LOT of fun up on a mountain at 3250 feet. Did all HF voice this particular time. And we're still camping out until after the 4th of July. Now, we're a mini-dxpedition! Hear us on the HF bands. We'll be working some 40 meters, but mostly, we'll be on 20, 15, 10 and 6. Hope to hear you!!)

73 de NW7US, Tomas.

Hello , I have a VX-5 forsales. NEW CONDITION It's about 3 months old
a 9Dxxxxxx series ,and I have never had a problem with it.
It didn't do any hardware mods, I just use the Sofeware EVE to mods it. I'm
not use 6 meters at all since there has no 6M repeater.
and the main reason I selling it is I need the money for my school . It's
comes with radio,antenna, box ,manual , case(CSC-73), Rapid desk
charger(CD-15), Mic adapter(CT-44)and
the RS clip on belt clip. I don't want to give it up but
I need to pay by school for next year. I'm asking $349 + shipping.Thanks
you!! Victor iden1000@hotmail.com

918. FRAUD WARNING Jim Bonner

Newsgroup: rec.radio.amateur.swap
Date: 1999-07-06 00:00:00 UTC
From: Jarrod Boehme <jboehme@pdq.net>
Message-ID: <KYhg3.155$E3.9066@news3.ispnews.com>
Source record: 8012
Cross-posted to: rec.amateur.equipment,rec.amateur.radio,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.equipment,rec.radio.swap

I want to warn everyone that this man, Jim Bonner, is not to be trusted. He advertised a /\/\ VHF HT1000 and I sent him a postal money order the next day on 5/6/99. He told me once that he received the MO and was shipping the unit Friday, 2 weeks after I sent the MO. After a week, I emailed again. He said this time he would be sure to send it that day. I called and he gave me an excuse about an ill family member that kept him from sending it. He also assured me he would now send it and forward tracking numbers. He didn't. Finally I tried to call him and I guess he was on the phone and used call waiting and accidentally answered my call and said it would be shipped. He hasn't answered the phone since. Then I heard nothing for another week. Finally a month ago he emailed that the scan function had died on the radio and it had been in the shop the whole while and that the money would be sent back. I wrote him a week ago and said if I didn't see it in 7 days, I would do just this. A warning to the newsgroups. He goes by Bnn801@aol.com and jbonner@firefilms.com . I made every effort to let him return my money, instead he tries to pawn off some other radios I guess with no intent to return the money. I hope this embarrasses him and informs you. I know that when you sell over the internet, you take risks. This one bit me. I know not everyone is like him, but those that are do exist and don't care about what is right. I haven't completely given up either. There still is a way to get my money back through the Post Office fraudulent claim procedures. Then they go after him. As one last token to fix this, I offer to erase this message if I do receive my money from him. Until then, he may see this a few times. Jim, all I wanted was a fair deal. If you weren't going to send the radio, be man enough to send the money back, like you told me you would.

His address is

Jim Bonner
2740 E. Ann St
Philadelphia, PA 19134-5716

and phone numbers

215-634-3606 <----now disconnected
215-331-0300 Wk

And here is the email trail.....

First Sign of Trouble

I am looking for a transverter for either 6 or 2 meters.
Must be 28 MHZ if if you have a 6 meter then 10 watts out is
fine if it is a 2 meter I need at least 25 watts.

Thanks for reading.

I am looking for a cavity notch filter or plans for building a notch filter. I am not sure if a single notch filter would be tight enough. I am trying to notch out a undesired signal in band. I run a UHF repeater and I have a bad desense problem. I use a good bandpass notch duplexer and have added a DCI bandpass filter (the repeater is in a very high RF environment). I just found the source of my problems, in band. A near by amateur UHF packet station. I need to notch out this frequency that is only about 1.8 MHz away.

Any ideas???

Mike

FOR SALE:
WILL NOT SHIP - TOO HEAVY
DFW AREA ONLY

YAESU FT901DM (NON-WARC) $350
WITH:
Hand Mic - Yaesu (stock) no connector
Desk Mic - Shure 526T Series II
Original Manual - Good shape

Radio is in Very Good condition. The Shure Desk Mic is brand new, just installed it 2 weeks ago using the mic connector off the Hand Mic.

Selling the radio because I am going QRP/Homebrew and want to sell off my QRO equipment. I get more enjoyment from building and operating than using commercial equipment.

Willing to discuss trade for other QRP or Kit radios, CW paddles (no Bencher, please), Station accessories, or Pentium Computers. But, would rather sell outright for cash towards an Elecraft K2.

If you would like a full discription of the Yaesu FT901DM, please click the URL below and scroll down to the proper section:

FS: YAESU FT901DM $350
DFW AREA ONLY

YAESU FT901DM (NON-WARC) $350
WITH:
Hand Mic - Yaesu (stock) no connector
Desk Mic - Shure 526T Series II
Original Manual - Good shape

Radio is in Very Good condition (9 of 10). The Shure Desk Mic is brand new, just installed it 2 weeks ago using the mic connector off the Hand Mic.

Selling the radio because I am going QRP/Homebrew and want to sell off my QRO equipment. I get more enjoyment from building and operating than using commercial equipment.

Would rather sell outright for cash, but willing to discuss trade for other QRP or Kit radios, CW paddles (no Bencher, please), or Station accessories.

If you would like a full discription of the Yaesu FT901DM, please click the URL below and scroll down to the proper section:

Several of us HAMs recorded what we could hear of the final transmissions from WNU and KFS today, of CW. This historic event is captured in four files from my site: http://hfradio.org -- the recordings are rough. I'm gathering other files from others... as time goes forward.

That's a shame; KFS was 599+ on 17.184.8 MHz here near Chicago. I didn't think to record them. I have a mini-disc player recorder handy, too.

Michael.

I have a few Samlex 23 amp continuous (25 amp peak) switching 13.8 VDC power supply, only 3 pounds, very small and most important it is RF QUIET for HF (or VHF/UHF). Brand new in the box, three year manufacturers warranty.

$95 + $6 shipping each. Once these are gone, they're gone.

To the price police who suggest other sources, they do NOT have any for less and the current price from them is $119 + shipping, it was a special that has come and gone.

Might look at home intercom systems. Mine is rather nice and you can
get them with Cassette and I think now CD.

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

Not sure why there is such little response to my previous postings. I guess no one is in the buying mood or there is truly no interest in what I have to offer or they just don't like posts from DejaVu . Just in case of the latter, I am posting from my personal email account in hopes that I can get some response to my ad.

SWAP/TRADE/SELL in Dallas/Ft Worth area
Yaesu FT901DM - non WARC band HF Tranceiver

Excellent condition. Email me your offer and we might work a deal. This rig is too nice not to be used and I cannot bear to see it taking up my closet space.

Surely, there is a Novice looking for a first time rig. If this is the case, I can make a special deal for you as long as it can be verified that you are a newly licensed Novice. This radio is much nicer than what I started out 22+ years ago.

Maybe you need a backup radio? This would make a nice one. Has everything built-in, AC supply, keyer, AF bandpass filter.....

Not a bad radio for the asking price of $300. Or, trade for "?". Or make a resonable cash/swap offer. A photo can be emailed to you upon request.

1) Yaesu FT901DM w/orig manual - $300 will not ship
LOCAL PICKUP ONLY - Dallas/Ft Worth Texas
2) Shure 526T II Desk Mic (NEW) - $120 shipped FEDEX CONUS ONLY
Discount for local pickup - $110
3) Sony ICF-SW100 w/acc., no box - $250 shipped FEDEX CONUS ONLY
Discount for local pickup - $240
4) MFJ-934 Tuner/Art Gnd w/man - $150 shipped FEDEX CONUS ONLY
Discount for local pickup - $140
5) MFJ-260C 300w Dummy Load - $30 shipped FEDEX CONUS ONLY
Discount for local pickup - $25
6) Johnson Viking Adventurer - FREE - LOCAL PICKUP ONLY
Only good for parts - rescued from previous owner who left in shed
7) Heathkit VF-1 - FREE - LOCAL PICKUP ONLY
Only good for parts - rescued from previous owner who left in shed

Items 6 & 7 above are "First Come, First Served". They where part of my original Novice station that I operated 22+ years ago. I rescued them from the previous owner who had left them in a shed and they have suffered exposure damage. I had plans to restore them, but just do not have the time. The Adventurer cabinet has some modifications that was done by the origianl builder (of whom I do not know). Not sure the cabinet is worth restoring.

Willing to discuss trades for:
1) QRP/Kit radios/accessories,but must be able to inspect trades "first hand" or via digital photo. Or, know the reputation of the builder. If still in kit form, I will consider trade "sight unseen".
2) CW Paddles - No Bencher Please.
3) Pentium Computer system with floppy/hard drives, SB card, CDROM, 32MB or more of memory. I do not need the monitor keyboard or mouse.
4) Desktop SW Band receivers. Later "Digital" models only please.
5) SW Band Active Antennas or SW Band tuners.
6) Bench 12V power supply. 20A or better.
7) VHF/UHF Allmode radio.
8) Yaesu FT90 Dualband radio - Yep, I know I'm dreaming.
9) Make me an offer, it can't hurt!

Source record: 7980
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

This unit is in cherry condition. I just sent it to the ICOM service center for a through checkout. They replaced a few item to bring it right into specs (dried out caps, mostly). It was working but I felt it needed a good run through.

This model has the Pass Band Tuning and Notch. I will include as many of the parts for computer attachment as I can find for free.

It has the very narrow CW filter option installed.

The case is not scratched. The display is completely clean and clear -- no scratches. There are no case markings or knobs markings worn in the slightest. Picture will be sent on request. I treasured this radio and took good care of it. I have the original box and manuals.

I would like to get $550 or better offer, shipped, insured anywhere in the U.S. (C.O.D. extra).

I will be moving soon and will be upgrading(?) to a transceiver for HF. Look for W5MDM on PSK31 really soon! I have been copying it with this receiver lately.

This is an excellent receiver for SWL or Amateur use. Ask around, it is well known and respected.

Fix the Spam Blocked email return address before replying. I HATE SPAM!!!!!!

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

Many of the SW55 photos I have seen, while very clear, might mislead people as to the size of the radio. This excellent receiver is less than half the size of an 8.5 x 11 in sheet of paper. A great travel radio. I love mine.
Brian Denley

I notice that the seller has changed his eBay ID recently -- maybe to ditch
some previous unfavorable comments? He's also quite quick to mention
that "Payment is to be recieved within 7 Days of close of Auction or
negative
feedback will be posted! "

Sounds marginal to me...

It is not always meaningful, but I am concerned with a seller with no feedback, and a bidder with no feedback. In the past, (at times) that combo has turned out to be illegal shill bidding. I have NO information that this is happening now. But I have run into it in the past.

Hello all,

Cleaning out my file cabinet of duplicates and manuals for rigs I
don't have anymore.

All are copies, but are in excellent condition. Not dog-eared, and
are crisp and white pages. All are complete cover to cover and are
3 hole punched in blue plastic-face binders (EXCEPT the Hallicrafters
Heath, and Gonset manuals which are just stapled).

Prices INCLUDE postage to any US Mailing address via US Mail.

1. T4XB (Transmitter) / T4 (Reciter) - $13 (Both units in one manual)
2. R4B Receiver - $13
3. TR3 Transceiver $13
4. TR4C Transceiver $13
5. MN-4 Tuner $8

Non-Drake:

1. Heathkit SB-614 Monitor Scope $13
2. Gonset GSB-100 Transmitter $13
3. Hallicrafters S-85 Receiver $8
4. Hallicrafters SX-110 Receiver $8

If interested, please drop me a note. Cash, check or MO all ok.

Thanks,

Dave WB7AWK

Steve

The designator "9236/Malayasia" has no signifigance as to part type.
This is the date code and plant of manufacture, i.e. the device you are
looking at was an MRF648 which was manufactured in Motorola's Malaysian
plant the 36th week of 1992.

Try RF Parts http://www.rfparts.com. Thye have the device in their
catalog singly and in matched pairs. They are not cheap `8^(.

Good luck on your quest.
Dave

Gentlemen.

I am cracking up in the warmth.....

Let's trade some treasures , with one another - ;-)

I have lots of European tubes , most is New In Box.
1920-30's,Wehrmacht,1930's power triodes,radar,traveling and micro wave, etc.

Lots of 1920-30's European radios , and also some later Hammerlund,RCA recievers
and so on.

I am looking for some old power tubes, mainly triodes.

If you belive that I might have some parts or set's , or whatever , that you need ,
please , do not hesitate to Email me.

- Sincerely Kurt Steffensen

Check out your area for a ham radio club to join - they exist in most cities. A fellow member, or the club station, will no doubt have a 6 meter rig you can try out.

9' Rohn Tripod. Heavy duty roof mount tripod tower. Has climbing rungs. A bit of surface rust; otherwise good condition. $20 or best offer. Pick up only, Hampstead NH.

Also, Commodore C64 computer with 1541 drive and commodore color monitor. C64 doesn't work. Best guess is it's the power supply. $20 or best offer takes the whole setup. Smith Corona daisey wheel printer. $10. Pick up only, Hampstead NH.

Source record: 7884
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap

I have the following items that I would like to sell as a package or possibly trade for some type of VHF/UHF equipment (dual band HT, mobile rig, base rig, etc.) or some type of 10 meter equipment:

Small Wonders Labs SW40+ 40 meter QRP CW transceiver. Has optional factory enclosure also has option Freq-Mite frequency counter. Currently set for the Novice section of 40 meters (easily changed to General & up portions of the band). Also includes a ten-turn pot that aids in tuning, but I have never gotten around to installing it as the factory pot has served me well.

NJ-QRP Club Rainbow Tuner with optional beautiful and 'bulletproof' enclosure. This is an awesome QRP tuner which tunes a longwire for 40 meter operation. It is powered by an internal battery and uses four small 'rainbow colored' LEDs to indicate SWR. You can view details of the Rainbow Tuner at http://www.njqrp.org The tuner is also easily converted to operation on other bands through a kit which I believe the NJ QRP Club is still has available. Connection to the SW40+ is made through a short piece of coax with BNC connectors on each end, which would be included. The tuner automatically turns itself on when it sense RF and run hundreds of hours on the included battery.

I also have a Ten-Tec AC5 QRP tuner which I bought that is missing the top half of the enclosure and basically needs to be cleaned and put back into working order. I have never used this tuner, but all it needs is dusting off and one of the connectors on the back repaired.

Depending on what is offered, either financially or in trade, I also have a Vectronics keyer that has been built into a Radio Shack plastic enclosure that conatains an internal speaker for code practice and is adjustable for about 3wpm to about 30wpm. It is powered by a 9 volt battery.

I am 99% sure that I have manuals for all the above listed items and would also provide them with the equipment.

If anyone is interested, please feel free to email me. Thanks and 73!

I AM POSTING THIS MESSAGE TO THIS NEWSGROUP AS I SEE ROLAND GETER CONDUCTING BUSINESS ON THIS NEWSGROUP. IT IS MEANT AS A WARNING TO THOSE CONSIDERING DOING BUSINESS WITH ROLAND GETER, I AM NOT LOOKING FOR FLAMES, REPLIES, ADVICE, ETC...THANKS

Hello Everyone,

On August 26, 1998, I posted a warning message about doing business with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message on the newsgroups in late June, 1998 for laptop computers for a "law enforcement" project. I e-mailed him about a Toshiba Pentium notebook I had for sale that was not working and needed minor repair. I specifically explained to him what was wrong with the notebook, we agreed on a price and Roland Geter agreed to pay shipping. He requested Fed Ex C.O.D. shipping, since he "did a lot of business with the shipping depot in Phoenix Arizona" and things would go a lot easier. It cost me $132.58 in shipping and C.O.D. charges to ship the package. I shipped the package as per his specifications and request and advised him of such. When the package arrived in Arizona, Roland Geter failed to pick up the package as requested by Federal Express several times. After several days the package was returned to me less my shipping charges I had already paid.
After that, I contacted Roland Geter several times by e-mail and phone to no avail. He always told me he was sending payment but never did. I finally took further action in late August, 1998. I posted the original warning message, contacted the proper authorities and filed a formal complaint with the Maricopa County Sheriffs' Office in Arizona. Roland Geter had stated to me he was a deputy with that sheriffs' office, (which later proved to be false).
After a lot of pressure from many on the newsgroups and the sheriffs' office, Roland Geter contacted me in late September, 1998, to call a "truce" and settle our dispute. I had received several e-mails from others who had been ripped off by Roland Geter so he agreed to pay me and then "square up" with the others. At that time I also agreed to stop the pressure from the newsgroups and the sheriffs' office.
To make a long story short, to this day I still have not received my money. I have tried to contact him several times a week to no avail. The others involved also have not received payment. I made the mistake of not doing a search on Deja News about Roland Geter, if I had, I would have found many others who ended up with the same fate as I did with my business dealings with Roland Geter.
I am posting this message to warn others of Roland Geter's bad dealings, i.e. bad checks, failed payments, bad trades, etc., that he

has done to many, many others and myself. Do yourself a big favor, do not deal in any way with Roland S. Geter, Sr.

Piero

For Sale:

Complete Hallicrafters lineup consisting of HT-44 transmitter, SX-117 receiver, PS-150 power supply and all necessary interconnect cables for full transceive operation. All units work fine. Good output and audio reports from transmitter. Receiver is stable and sensitive. I would be glad to schedule a QSO on 20 or 75 for over-the-air checks. Original manuals are included.

I would like to sell as a set for $425.00 plus shipping. Would consider splitting up, if no takers on the complete set, so don't be afraid to ask.

This is a nice looking set and we've all seen the Ebay prices recently so here's a chance to get them at a more realistic price.

August 11, 1999 is the day of the total eclipse -- a very important event this particular year, with the solar maximum so close. Radio Hobbiests are invited to observe the Audio Eclipse. Please visit http://hfradio.org for links and information about how you can participate.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

Heya,

I picked up a radio shack BTX-123 Business Band 2M radio... the manual says
the freq's are limited to 1511.225 to 156.250. Its a Xtal controlled radio.

Would it be possible to add xtals for a 2M ham freq in this radio without
making any mods? or is there even a mod available??

Please e-mail the reply! dylan@newsguyla.com
thanks

Hi,

I just bought this unit June 22nd, and received it July 14th and have
used the MVT9000 very little since the time of purchase, < 1 hour on it.
I have
just recently acquired an IC-R7000 base model and I never really had a
need
for a handheld, but it was great while it lasted. Including accessories:

OP-90 Case
MVT-7100 Antenna (It sure beats out the stock 9k antenna)
Radio Shack 20-006A
Universal Power Adapter
Box, manual, packaging (yes i kept it :)), original receipt, batteries,
belt clip, handstrap, 9k stock antenna, etc...

Please e-mail me a reasonable best offer, everything is mint, less than
an hour of use and no "shock" thanks from help from Rich on the polarity

part :).

Regards,

Aaron

Hi all. I recently did a job where we used about 500 LTS2000 Motorola portable trunking radios. Now I'm interested in purchasing some, but before I commit to them I'd like to check some stuff out first. I'm looking primarily for the RSS software so I can see what I can program these radios to do, but I'm also looking for any manuals ie. the radio manual and the RSS manual. Should I decide to buy these radios, I'm planning to buy most of this stuff new, but I don't want to spend all the money and then find out i don't need it. Also I'm having some trouble with my news programs, so if you could cc a copy of your reply to my email address, it would be muchly appreciated! Any info at all will be appreciated!

Thanks in advance for your help!

Josh Koffman

Hi! Everybody, I've a VX-5R for sales w/ LOT of accessories:

The package include the following items:

1. BRAND NEW condition VX-5R radio.
2. Box and Manual
3. Wall AC adapter/charger
4. CD-15 Stand charger
5. CSC73 soft case
6. SU1 Barometric pressure/ Altitude sensor
7. Comet SMA dualband antenna

If purchased seperately this package would run well over $420.

$349 shipped.

Thanks and take care!!

Hey Josh,

We have 35 of those radios in 900Mhz and they're absolutely lousy. Poor
r'cvr and transmitter preformance, only run about 6 hours on a charge.
If I could throw them away, I would. We've had a lot better luck with the
MTX9000 radios.
But you know what they say about opinions...

Dan

I don't know how many of you know of this, but I think you should consider joining this project with SETI (the SETI@home project). Major COOL!

What is the SETI@home project?

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a free program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.

http://setiathome.ssl.berkeley.edu/ is the URL - check it out.

Also, if you are interested, once you install the software, you might wish to join our group, the NW7US Radio Group -- you'll find us under the groups section.

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

$325 including shipping UPS CONUS.

I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

I am getting out of the hobby, so no trade offers please.
I live in Dayton, OH for those close by.

For info from Kenwood's web site go to......
http://www.kenwood.net/products/index.cfm?AMA=open&ama_mob=open&radio=TM-742AD&selection=Amateur

My unit is the 742A model (not the 742AD). From what I've been told, the only difference is the AD comes with a back lit mic.

The price is firm. It is priced at less than 50% of what I paid.
I will pay the UPS shipping to you (US only).

Contact..... greggw@erinet.com

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Purchased this laptop about 1 month ago, my company purchased me another one less than 2 weeks ago. I'm looking to trade my laptop for a HF rig. Must be in excellent working condition as well as cosmetically good condition. MUST have built-in antenna tuner. 90's era radio's are all that I'm interested (other than possibly a TS-940SAT) that would also be considered.

Here is what I have.
Pentium 166 Mhz Laptop
16 Megs ram expandable to 80 megs
2.1 GIG hardrive
1.44 Floppy drive (swapable)
20 Speed CD Drive (Swapable)
12.1 Color Screen DSTN
56K PCMCIA Modem

Interested parties either email me at kc4oxp@flash.net
OR
Phone 770-867-5156 5pm-10pm EST

Just back from Yaesu for repair to 10tr FM Top of case damaged in shipment and Yaesu put a new top cover on it so it is obviously a little lighter in color than the original 17 year old bottom cover. Rig has ALL FILTERS, AM,FM,USB,LSB,CWW, CWN plus the CW filtering down to about 100 hz and shift will knock off a cw qrm 100 hz away from you. Continuous coverage receive 100 khz-29.999mhz. will transmit everywhere it receives except for the U.S. AM Broadcast band all optiones are on this rig and all updates by Yaesu. Mike and power cord.700.00 plus shipping.

1103. Solar Flux and DX

Newsgroup: rec.radio.amateur.swap
Date: 1999-08-29 00:00:00 UTC
From: dt@accessnow.com
Message-ID: <37c96ec8.6771851@news.olypen.com>
Source record: 7900
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.swap,alt.radio.swap

Solar flux of 248 today, is record for this Cycle. K index at the moment of 1, A of 14 -- heck, the bands should be hopping today and tonight. Heard long paths fairly loud today. But, Aurora activity (level 4 and 5 today) is indicating some polar absorbtion.

I've added the aurora level report to the eAlert that I offer. The eAlert seems to be a popular service -- I have had a large number of new subscribers.

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

73 from NW7US

I have for sale a Yaesu FT-911 FM hand-held transceiver. This unit is
for transmitting on/in the 23cm band in ham radio . It is about one year
old & I am selling it because I hardly use it.
It is in mint condition . I kept the box and never sent in the
registration for it .
Heres what it comes with :
CSC-35 case -(for the FNB-17 battery)
CSC-37 case -(for the FNB-12 battery)
1ea.- Yaesu FNB-17 7.2V 600mAh compact battery (new never used)
2ea.- MAHA FNB-12 12V 600mAh Ni-MH batteries (used very little)
1ea.- NC-28B Yaesu battery charger for FNB-17 battery (new)
1ea.- NC-18B Yaesu battery charger for FNB-12 battery(good condition)
+ the FTS-17 CTCSS Subaudible Tone Squelch Unit is installed in it.

Source record: 7925
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

Greetings, all:

I need info on an old Kenwood TM-701A dual bander that I picked up recently. I don't have a manual, and would like to acquire one. Barring that, I'd like info on how to program a PL and save frequency and PL to memory. I don't even know if this rig had a PL encoder installed...was it an option? I can get a "CTCSS" line on the display, but have no clue as to what tone is transmitted or how to change it.

This rig also has the RC-10 remote controller (looks like a telephone handset) installed. I'd rather have a basic hand mic...anybody have one that will interface this radio?

I'm not very familiar with older Kenwood stuff, and ANYTHING I can find out will be greatly appreciated!

Thanks in advance!

A plan to setup a local amateur radio class didn't pan out, so the
following equipment is for sale.

All items are in mint condidtion, with little if any use.
These items are located in San Diego, CA.

Yaesu FT-90 dual band mobile.
Includes box, manual, warranty registration card

$300.00

Yaesu VX-5R tri band (6M, 2M, 70CM) hand held.
Includes CSC-73 CASE, CD-15 DROP-IN RAPID LITHIUM-ION BATTERY
CHARGER, box, manual, warranty registration card.

$275.00

Kenwood TH-G71 dual band (2M 70CM) hand held.
Includes case, DROP-IN QUICK CHARGER, box, manual, warranty
registration card.

$175.00

Cushcraft A27010S dual band yagi.
Assembled and ready to go. Includes 100FT coax, tripod, mast.

$50.00

Bearcat 895XLT trunk tracker scanner
Includes box, manual, warranty registration card, external
antenna.

$175.00

Astron RS-12A power supply
Includes box, warranty registration card.

$50.00

For sale, one ~1951 vintage US Navy R-366/TRR-5 general coverage receiver that covers .54 to 30 MHz in five bands. This radio was used for entertainment purposes and is truly a monumental piece of equipment. Weight is specified as 85 pounds and the cabinet is 14" high, 19 3/4" wide and 19 3/8" deep. The R-366 has 16 tubes with two RF amplifier stages, two IF stages, crystal filter, a four gang tuning capacitor, and push-pull audio output. All of the tubes with the exception of the rectifier are "minature" type (6BA6, 6AQ5, etc). I have owned it for about 20 years and I am thinning things out prior to a house move. The radio is nearly bone stock except for the addition of an antenna trimmer circuit and this is easily removable if you wish. Most of the original paper capacitors have been replaced and the radio works very well. The radio's front panel is very nice, there are scratches on the top and sides. I don't know what it's worth....it ain't no 51J-4, but it is not often seen....so I'll ask $175. Shipping is out of the question. I am located in the Detroit Mich area. On 12 Sept, this radio may be brought to the Findlay Ohio hamfest. Phone me at 313-382-2213 after 4PM EST , 313-317-2398 days, or reply to XYZ_p15218@flash.net but remove the XYZ_.

73,

There are a number of "secondary" functions that you access by holding the function button until you get a double beep. I can't recall all (as I just sold the radio), but here's a couple I remember.

F (1 sec) then VFO: Changes scan mode from 5-second pause on an active channel to pausing until activity ceases.

(I think) F (1 sec) then MR will skip the displayed memory during scan. (it puts a star or removes the decimal point...I can't recall which).

Also, there are three scan modes. When you are on a VHF (or UHF) memory channel, pressing the MR (or UP or DOWN on mic) for more than one second will start scanning THAT band. After starting scanning, press the BAND button and it will scan all memory channels on both bands. Another handy scan feature scans between one VHF and one UHF channel. Set the radio on the VHF memory (or VFO) frequency, then set it on the UHF frequency. Press and hold the BAND button for more than one second and it will scan between those two frequencies.

You can band scan by pressing and holding the VFO button until scan begins. Alternately, you can press and hold the UP or DOWN button on the mic when the radio is in VFO mode.

Note that scanning is rather slow.

The Duplex button allows you to listen on one band while transmitting on the other. I never found it too useful, but it can be used for cross band repeat (see below).

The radio can be modified for extended transmit (If not already done). Open the top (with speaker...I think) and you'll see a loop of green wire coming from the area of the front panel. Clip it to enable it.

THere is also a cross-band repeat feature that requires a mod. The mod (and the above one) is on QRZ.com.

Nice radio!! BTW: I seem to recall that it did have PL decode as well as encode. Could be wrong here!

email if you have any other questions.

Mark

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model NTN7394), antenna and detachable belt clip. One has the keypad option at $350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

BeaconClock is once again available for Internet download from the SA Watch/KaWin/PicturePacket home page: http://www.sni.net/kawin/.

BeaconClock is Freeware for DXers.

BeaconClock is your on-screen, real-time, schedule of the transmitting times, frequencies, short-path and long-path beam headings for each of the NCDXF/IARU International beacons. 73 es DX,

Stan

1157. PicturePacket 1.41 available for download

Newsgroup: rec.radio.amateur.swap
Date: 1999-09-10 00:00:00 UTC
From: Stan Huntting <stan@sni.net>
Message-ID: <7rbdo3vuj1@news-2.csn.net>
Source record: 7757
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

PicturePacket is a Windows95/98/NT control program for TNCs. In its Lite mode it's all the software many packet users may ever need, and it's free! Download version 1.41 from the SA Watch/KaWin/PicturePacket home page: http://www.sni.net/kawin/

PicturePacket 1.41 adds Internet DGPS Beacon mode for registered PicturePacket/Plus users. Now, any packet radio station can beacon DGPS correction signals obtained directly from the Internet. This beacon data is decoded by the receiving TNC to dramatically reduce the position error of GPS.

1166. I think it's a Hy-Gain DX-88

Newsgroup: rec.radio.amateur.swap
Date: 1999-09-12 00:00:00 UTC
From: Ed/N3WJA <n3wja@arrl.net>
Message-ID: <VRNC3.1556$sl4.10853483@news-read1.qis.net>
Source record: 7766
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

I just received an HF antenna that I think is a Hy-gain DX-88. There is a total of 8 small black coils and one is marked 80 40M ASSY, 878532, HyGain 1991. Since it has the 80 meter coil, I figure it is the DX-88. There are also coils marked for 10,12,15,17,20 and 30.

Does anyone have the assembly instructions for this antenna they can send or copy an mail. I will gladly pay for the copy charges. Ed/N3WJA

Robert:

So, how is this Ebay related?

Maybe I missed something, but it sure looks like a direct sale notification
to me.

Source record: 7772
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.swap

For Sale -

Hallicrafters SX-130 - complete but not too pretty. This radio must have been in the garage a few too many years as the slide rule dial lettering is coming loose from the glass and the chassis is a bit rusty.. It would make a good parts radio as it is complete with all of the original knobs, good power transformer, i.f. cans, etc. Actually if a guy could re-do the dial somehow, it would be a good restoration candidate, I suppose.

$50.00 shipped

Click on this link to view:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=165539516

Condition: Very good, original paint, no rust or corrosion

Extras: Spare modulator deck, wheeled roller base, service manual, 3 wire line cord, blower fan switch mod, and rear outlet cover power plate

Produced in large numbers during the 50's and 60's, the T-368 transmitter was used by the military as a multi-purpose unit. Affectionately known as the "T-3" a great many were placed in stationary RTTY service, while others were used for AM and CW operation. As a medium power transmitter the T-368 was overbuilt for continuous 7/24 service.

The unit weighs about 700 lbs., and is roughly cube shaped. Height and length are close to 41". It's modular construction allows easy access for service. The lower deck, and the most heavy, is the power supply section. The middle deck, and next lightest, is the modulator, and the top deck is the RF section. All decks are equipped with Cannon connectors and can easily be removed for service and troubleshooting. It fact it is possible to "hot swap" defective decks while the power is still energized with no adverse effects.

The T-368 requires very little in the way of conversion for use on the amateur bands. With its 450 watts of carrier, and heavy duty construction, the T-3 makes an outstanding amateur transmitter. A few simple safety and convenience changes are all that is required. See the Conversion button for more information.

For more info and photos of this unit, use this link
http://www.buffnet.net/~bhowes/t3sale.htm .

Due to the weight and size requirements, this unit must be picked up in Buffalo, NY. Or you can arrange pickup, crating and shipping at your expense.

Payment must be made within 1 week in certified funds.

Any questions, just email.

Tnx!

Cross-posted to: rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment

I have a absolutely mint Diawa 500 watt PEP automatic antenna tuner model # CNA-1001 80-10 METERS, that I wish to trade for same condition Sony SW55 or something near to this portable (2010 for example but must be pristine) May consider a desktop. The Diawa supports coax-1, coax-2, dummy load 12 volts DC.

Hi Ron,
Has the HQ170A gone yet? Do you have any pictures. I am very
interested in getting one of these receivers.

Last chance to own a classic .....

Heathkit HW-8 QRP CW Transceiver

Operates on the lower 250 kHz of the 80, 40, 20 and 15 metre amateur bands.

Only modification from original is the addition of an SO-239 antenna connector in parallel to the stock RCA phono jack.

Check it out at

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=164441346

1198. FS: Icom 756 Transceiver

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

Additional Specs from website: The ICOM IC-756 is an all mode HF and 6m transceiver. It has a 4.9" blue LCD and dot matrix display, and features selectable AGC, microprocessor controlled automatic antenna tuner which also covers 6m, built-in Digital Signal Processing, built-in CW memory keyer with auto-count and repeat functions, CW reverse, dual watch (monitors two frequencies in the same band simultaneously), 100 memory channels, microphone compressor, RF attenuator (four step), RIT/XIT, spectrum scope with selectable passband width offers a graphical display of activity up and down the band, SWR meter, transmit tone equalizer, triple band stacking registers, twin passband tuning, VOX, 100% duty cycle (HF & 6m), and much more!

Thank you!

Butch:
If you are looking for a Xcvr control program, Kenwood has a very nice TS570 program for windows that can be downloaded from their website. This program will also control other Kenwood rigs but the graphics appear to be styled for the TS750. You can download this program from: http://208.197.91.81/

For R-5000 or TS440 operation, fineware offers Smart Kenwood Control 32, which I use with my Kenwood. This software also provides a database for broadcast stations. To see this program, check out: http://users.erols.com/fineware/skc.html This program is outstanding.

It is a AT-180 I cut the wrong line out of the HRO site.
Here's the correct line:
57) ICOM IC-AT180, EXTERNAL AUTO ANT TUNER IC-706 $499.95, In Stock

On Fri, 24 Sep 1999 Framix@aol.com wrote:

LPU Intrinsically SAFE BENDIX/KING RADIO'S For SALE or TRADE
this is what i have to offer
3x 14 channel UHF hand held's (438-522mhz)model number LPU4141X
2x Speaker Mikes
2x Extra Batteries
1x Fast Charger
1x Programming Lead (PC to RADIO)
1x Software

these radios are in VERY good condition and are perfect for the
Emergency services as these radios are Intrinsically safe and can go
into petrochemical plants and the like

these radio can be upgraded to 192 channels if need be by fitting the
keypad to it but they loose their Intrinsically safe rating

asking $450 usd the lot or will consider trading with
anything to do with Radio e.g.: dual bander,small hf,whaterver

airmail to the US is $45 usd and delivery is 4-7 days

give me a email direct on mitch@nw.com.au
if you are interested

Hi, I've got a TR-4C, MS-4C, AC-4C for sale. The radio is serial number 34886. The radio might be a 9 out of 10. I never cared for that numbering system much so I have pictures available on the radio and speaker/supply. There is a scratch on the right side of the MS-4.It works great and I use it all the time you can hear it on the air any time in the evenings or Saturday morning, (depending on your location). E-mail at swb1@flash.net for pictures. I'm asking $400.00.
I would consider a trade for like value equipment
Thanks
Steve KC5TFL

Message-ID: <37f9816d@News.Destek.net>
Source record: 7732
Cross-posted to: alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.commercial-lmr,rec.radio.swap

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model NTN7394), antenna and detachable belt clip/holster. One has the keypad option at
$350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in good condition as removed from military service.

This is a military/commercial quality amplifier that uses a single 4CX3000A to produce KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10 seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $2,750.00 unpacked.

I have a few tested and Guaranteed 4CX3000A tubes at $750.00

crating by a professional packer is $300.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site

If you need more info please contact me.

The Syntor doesn't use crystals, it uses an "R prom" that is "burned" by the programer. It is not re-writeable, it can only be used once. Every time you want a new freq., you have to burn a new prom. VERY EXPENSIVE, unless it is going to be used for a repeater or in the Business band where it was originally meant to be sold.

Or if you have access to a prom programmer (or even if you don't) go to
http://www.geocities.com/SiliconValley/5857/ and spend 20 minutes reading.
The proms are like $2.00, and Mr. Bennett's software works great.

Not exactly, the EPROM goes for about $6-10 apiece, retail. The suitcase programmer, on the other hand, is quite expensive. Helps to have friends who let you use theirs occasionally.

Hello to all.
I'm looking for this little tunable FM transmitter (87-108 MHz)that
was made in the late 1960's by Kinematix, model number "IMP II".
It's 3 x 1-1/8 x 2-3/4 in size.
It's black and has a slide power switch on the front.
A microphone could also be plugged into the top. It was tuned
with a plastic tuning tool. This gem is in the 1967 Lafayette
Radio catalog for $39.95.
Does anyone out there have one of these at the bottom of a draw?
If so, and if it's in working order I'd like to buy it from you.
Let me know how much you want for it.
Please e-mail me direct at: mrusso@hoflink.com
THANKS, Mark N2FLF

Always Available through Technology..... UNLESS SOMETHING BREAKS!!

HAMFEST October 24, 1999 - Lindenhurst, LI

GREAT SOUTH BAY AMATEUR RADIO CLUB
ARRL APPROVED LONG ISLAND HAMFEST - October 24, 1999

LINDENHURST, LI - NY

On October 24, 1999 the Great South Bay Amateur Radio Club will again sponsor an indoor Hamfest-Computer Show. The location will be at the:

Knights of Columbus
400 South Broadway, Lindenhurst, NY.
This is an ARRL approved Hamfest.

There will be radio equipment, electronic components, computers and accessories, software, books, technical manuals, ARRL information, Amateur Radio License Exams, Door Prizes.

Advanced registration is $15.00 each table. Tables at the door are $20.00 each. Contact Peter Portanova WB2OQQ at 516 541-4886 for table reservations. NO TABLES WILL BE RESERVED WITHOUT PRIOR PAYMENT due to the space available.

General admission is $ 6.00.

VE - ARRL - 12:00 NOON at Babylon Town Hall, 200 E Sunrise Hwy, Lindenhurst. For exam candidates please remember to bring your original FCC Amateur Radio license (if licensed), any C.S.C.E. forms that are pending, plus a photocopy of each, pens, calculator, formal form of ID (preferably photo ID), and the examination fee, to the exam session. 1998 ARRL/VEC fee is $ 6.35, exact change is appreciated. Novice exams are free.
The VE team is from ISLIP ARES Group and GSBARC. Thanks guys.

Talk-in will be via GSBARC Repeaters on 146.685 4Z(136.5) PL.

Food Service during the Hamfest will be provided by members of the Knights of Columbus Council.

Information is also available during the GSBARC 2 meter info net every Monday evening at 7:00 PM following the Newsline Report on the W2GSB repeater, 146.685 -600 4Z(136.5) PL required. You may also write to:

I had listed this a few weeks back, but the person who expressed interest did not send off payment, so I am relisting it once again. Tnx.

==========

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

73,

Bruce KG2IC

Radio shack has a small wireless mic that plays via FM radio that might work for you. Also try ALL electronics in Los Angeles on Vermont Street, they have a web page but you will have to do a search.
Good Luck

I don't know if you need that particular model, but I just ordered a kit from
Jameco for $9.95. Tunable 100 to 108 Mhz, 9 to 12V. They also have a stereo
kit for $29.95 which is tunable 76 to 108 Mhz, 9V. Both are about 2" x 3".

Hello to all.
I'm looking for this little tunable FM transmitter (87-108 MHz)that
was made in the late 1960's by Kinematix, model number "IMP II".
It's 3 x 1-1/8 x 2-3/4 in size.
It's black and has a slide power switch on the front.
A microphone could also be plugged into the top. It was tuned
with a plastic tuning tool. This gem is in the 1967 Lafayette
Radio catalog for $39.95.
Does anyone out there have one of these at the bottom of a draw?
If so, and if it's in working order I'd like to buy it from you.
Let me know how much you want for it.
Please e-mail me direct at: mrusso@hoflink.com
THANKS, Mark N2FLF

Always Available through Technology..... UNLESS SOMETHING BREAKS!!

This is what I got.

FM PLL TX 2-3 WATTS

R. Scott Communications LTD phone 250 642-2859

They also got some 20-100 WATT

Its in Canada, don't know if they still sell.

Got mine for about $300. Its fully assembled, got a jumper switch block to change freqs. Get about 1/2 mile on my setup.

xman Charlie

Greetings Fulton..

Looks like you've got a nice unit!! However, I think at the price quoted it may be competing with Time Step's PROscan receiver:

Reference:
Scroll down until you see PROscan APT Receiver, also click on the pictures
http://www.time-step.com/apt/apt.htm

In the USA it's sold by Swagur Enterprises Inc. (joint cooperation) as illustrated at the following:
http://www.swagur.com/
On the left hand side of the screen click on APT Satellite. At the new window, scroll down and find Swagur-TimeStep PROscan Receiver. Notice the USA price.

No doubt that your receiver does indeed offer some features that this receiver doesn't. One thing that is nice about the Time-Step PROscan Receiver is there's no squelch. The scanning portion of the receiver locks up once the 2400 Hz carrier of the click-click-click sound is heard as the satellite comes over the horizon. Yours may be designed the same way..

Cheers,
Gary

After the QST article regarding the inexpensive R139 over here in the states, many folks are going this route only due to the price. Ref.: http://www.hamtronics.com/ and the receiver at: http://www.hamtronics.com/r139.html . However, this is *certainly* not to be compared to what you've got!

..SNIP..

1279. TRADE: Viking Valiant 1 for Hallicrafters SR-150 or 400

Newsgroup: rec.radio.amateur.swap
Date: 1999-10-25 00:00:00 UTC
From: Skyrider Defiant <cfries@tic.bisman.com>
Message-ID: <Gk%Q3.2998$tS1.17852@newsfeed.slurp.net>
Source record: 7680
Cross-posted to: rec.audio.tubes,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.cb,rec.radio.shortwave

Trade even up: Viking Valiant 1 for Hallicrafters SR-150 or 400 with power supply/speaker, in like condition.

Freshly tubed, solid state modules in place of 846's. Front panel is exceptionally
nice; nearly mint. A few scratches and minor knicks on the upper lip.
Only draw back, someone widened out the right hand manual/ptt
switch hole. An on/off flange hides the flaw nicely. All knobs and inserts
intact and like new. Crystal knob cover is there. Lettering perfect. VFO
is beautiful.
The maroon cabinet has been painted, not a perfect job, but not bad.
Has a transmit-receive relay built in.

Let me know what you have!

Regards,

Cary Fries
cfries@tic.bisman.com

Not meant to start another thread on ebay, but this type of thing is unscrupulous at best:

RARE HEATH HW-101 SB-101 CB 11 METER CRYSTAL!
Item #182756483
Expand the capabilities, value and resale value of your Heath HW-100, HW-101, SB-100, SB-101, SB-102 with this Magic Crystal. Simply remove the 10 meter crystal from your rig and install this crystal and you have 27 MHz operation (the 'beat' frequency of this crystal is
37.39500 MHz). You can transceive on SSB or CW on 11 Meters! Even install it to increase the resale value of the transceiver by magnitudes to a CB'er! Crystal is Brand New! Buyer prepays with shipping within 7 days of auction close.

I've sent a note to SafeHarbor@ebay.com about this, but wonder if anyone would like to comment
on the legalities of this.

Buying or selling a crystal for any frequency is not illegal. Putting the crystal in a radio is not illegal. Turning the radio on and receiving is not illegal. Once you key the mike the picture changes...

I saw that too, and had to chuckle. It's not illegal to install
such a crystal, or to receive CB transmissions with the radio
once it's been modified. It's illegal to transmit, however.
Still, it's silly!

Creative advertising at work, eh? But, do remember, in other parts of the world, outside of the United States, it is perfectly legal to operate even that green stuff on 27 MHZ frequencies! And, of course, that xtal can be ordered by the thousands from a multitude of crystal manufacturers around the globe -- so much for the "rare" aspect. Selling/having it is certainly not illegal per se, but ......

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. MC-48B DTMF Micophone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable (you can buy or make one easily). Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $169.00 Buyer pays shipping.

What is the propagation like on this band?
How old is it?
How many memories and TX PWR levels.
Sounds like it probably is a very private band.
We have only 3 repeaters in my city on this
band.
Do you know the band allocation for this band?
How much of the band is shared with other services,
how much of it is simplex, etc.
Is the simplex coverage similiar to 450 MHz?
thanks

DON'T attempt a solid state replacement - unless you ALSO install a
dropping resistor to comphensate for the increased voltage, otherwise
you may damage parts, and make erroneous test readings...

Been there, done that...

1311. PIR Motion Detectors, RF-Linked

Newsgroup: rec.radio.amateur.swap
Date: 1999-11-03 00:00:00 UTC
From: martinejones@my-deja.com
Message-ID: <7vpe0rqhb1@nnrp1.deja.com>
Source record: 7562
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap

I swapped a nice pool cue for a case of these, and have more than I can ever use. They consist of a passive-infrared motion detector and a UHF transmitter housed in one white plastic case about 5" high (they look just like the ones you see on the wall in banks and credit unions). When someone walks within about 40 feet in front, the unit transmits a "telephone-ringing" sound to a UHF FM receiver (lower portion of 70-cm ham-radio band).

There is also a "tamper switch", whereby the unit sends the alarm if anyone removes it's cover. They use standard 9-volt alkaline batteries.

I use these when I go camping. I put them on trees near the approach paths to my site, and sleep with my handheld scanner in the tent to receive the alarms.

If you don't need the wireless feature (or don't have a receiver) you can also tap off the internal voltage supplied to the RF PCB and use this to run a piezo alarm or a relay.

A four-pack is enough to protect a the major areas inside a house, or a campsite from all directions. 4 for $25, new in boxes and packaged with mounting hardware. Batteries not included, you pick up or pay UPS.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless"
watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant condition. Used indoors, and briefly used mobile. I would like to keep it as a set (both radios,cable, and software), but will be willing to seperate if I can sell all components. Would like to get $700 for the package.

I have 2 UHF P110 motorola portables, both working with the following exceptions:
1 has channel knob broken
1 Keys up when turned on, but it times out OK,
Both receive OK, channel freqs unknown. Otherwise, 8/10 condition with (2)batteries, (2)antennas and (1) standard charger. I will take $300 for the pair or consider trades for iCOM R10, Yaesu FT-50 or Alinco DJ-X10E

E-mail me with any questions
mailto:mcguyver@bv.net

I sold the other 5 already

Yes it will but I think it will only work on the older saber modules; since your keyloader is an AX it won't do the later Advanced Securenet or Multikey/OTAR. BTW, Panik's electronics had upgrade kits for the AX/BX keyloaders to limited DX. And Batlabs has a good cross reference list of encraption module part numbers.
Good luck.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless"
watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant condition. Used indoors, and briefly used mobile. I would like to keep it as a set (both radios,cable, and software), but will be willing to seperate if I can sell all components. Would like to get $700 for the package.

RICK: The 83 is 5 volt 3.0 amp heated rectifier with fairly heavy ratings for a receiver rectifier tube.It has a 4 pin UX-4 base?
I always felt the 83 was a forerunner of the 5U4 (octal base tube). Maybe you could use get and use a 5U4. Have to change the tube base though
Another alternative is to solder two solid state diode rectifiers into an old UX-4 tube base and plug that in. However the full voltage will come on the HT rail immediately you switch on. That may be OK or you could add a bit of resitance into the circuit. Again you may be able to do that on the substitute rectifier tube base itself and not interfere with the units wiring at all.
You mention this is for a tube 'tester'. In that case it may not have any filter capacitors to worry about when putting the full (peak) rectified voltage onto the HT rail.
Just a few thoughts. Also try searching on <duncanamps> for info on the 83.
Regards. Terry S. Torbay, Newfoundland Canada.

1340. FS: Motorola Flip Phone, Diamondtel Phone & ACC. {Amateur Radio Project Abandoned}

Hello,

I originally purchased the equipment below for an amateur radio project, but I lost interest in pursuing the project. If anyone else would like to try their hand, or whatever, please be my guest. Phones are in good working condition far as I can tell. Would like to sell everything as a package. Serious offers considered.
TERMS: Prepayment by postal money order, prices include UPS ground shipping or USPS Insured where applicable. I will also consider trades for Motorola Star-Tac accessories such as a Motorola Star-Tac Desktop Charger(s), high capacity Lithium-Ion batteries (black), etc.

(1) Motorola "Flip Fone" Gold Series, dark gray, in excellent condition with leather case, tabletop phone/spare battery charger, Standard NiMh and slim batteries ..... $ 40.00

(1) DiamondTel Mesa 90X, in very good condition, with tabletop phone/spare battery charger, two standard NiMh batteries, car adapter, and instruction manual ..... $ 40.00

(1) Motorola "Flip Fone", lt. gray. This phone is in good condition with standard battery and tabletop phone/spare battery charger ..... $ 25.00

The DiamondTel Mesa 90X and the Lt. Gray Motorola Flip Fone were purchased at a local Amateur Radio show from an individual who I believe was a tinkerer. It wouldn't surprise me if the two were cloned, but I have never actually used the phones. I purchased them for a Amateur Radio microwave project but never actually used them for the project.

I also have the following accessories:

(2) used antennas, one "back of the set" antenna and a "window" portable, both rubber ducks ..... $ 5.00

(1) used battery eliminator for the DiamondTel 90X ..... $ 5.00

(1) Brand New in the package battery eliminator for the DiamondTel Mesa 90X ..... $ 10.00

(1) Brand New in the package 6V NiMh Lt. Gray battery for Motorola "Flip Fones", Micro-Tac, etc. ..... $ 10.00

(5) Brand New in the package 6V NiMh Black batteries for Motorola "Flip Fones", Micro-Tac, Flare, Elite, etc. .....(EACH)$ 10.00

(3) Brand New in the package NiMh batteries for DiamondTel (EACH)$ 10.00

If interested, please e-mail directly n3fvg@worldlynx.net Thank You

Please take a look, I've listed a wide variety of HF gear, all in good to excellent condition, including a TS-50S, Mosley TA-33Jr, Create Roof Tower and more. All auctions are "no reserve", and the prices shown are current as of 11:00am EST 11/7.

Here's the list of the auctions with the links:

TS-50S Xcvr - with 500hz filter
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193474314
$455.00

AT-50 Tuner
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193480344
$142.50

AL-811 Amp
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=192180838
$355.00

BY-1 Paddles
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=192295958
$44.00

MB-13 Mount
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193487269
$13.50

CR-30 Tower
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=194076537
$76.01

TA-33Jr Beam
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=194092149
$105.00

TB-3 Bearing
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=194097915
$53.01

Thanks for reading and 73

I'm still looking for a AEA BT-1 morse code trainer in exellent shape with the original manual or a good legible copy. If you don't have a manual or copy please do not respond.

Please let me know what you have...

Sam / N6FAV

Hi,
How much are you asking for the radio?
Russ

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. Hi and low power settings. MC-48B DTMF Microphone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable. Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $159.00 Buyer pays shipping.

Approximatly 180 degrees W, or E for that matter, longitude! [varies with civil
authorities.]
Look for anything from the Marshall Islands or New Zealand.
Ham types listen for ZLs, KH7 and KX6
Bo

The International Date Line does NOT cross any land mass. Your
nearest lands masses are New Zealand and Australia. Go here for more
info: http://aa.usno.navy.mil/AA/faq/docs/international_date.html

Can someone tell me where the international date line is?. I want to know where January 1, 2000 will begin first so that i may tune into SW broadcasts from that area of the world in an attempt to learn if any significant problems may be headed our way. Also, if anyone has any idea what a handfull of frequencies representative of that area (and time) it would be information useful to many out here, I believe. Thanks and have a nice day.

What's that small island/country to the west of Australia? I hear that's the first country of the year 2000.

It "technically" crosses right thru the island of Taveuni in Fiji, but they opted to have it "detoured" around this country of 300 islands. I believe it is the ONLY land mass that is technically on the IDL.

Look on your globe at 180 degrees E or W, and about 15 degrees South latitude and you'll find it.

Since Fiji already has some infrastructure in the larger cities like Suva and Nadi, I'd look up and monitor their broadcasts.

misc.survivalism,alt.ham-radio.marketplace,alt.survival,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

I have two motorola MOCAT cb radio's. Motorola quality in a CB radio.

Both are 40 channel units.
The first model 4000 is a 40 channel with a analog dial. Has Public Address switch (PA). Has top mounted speaker and jack for external speaker. The mic on this unit is a stock motorola mic and is questionable. It sometimes works, sometimes doesnt. With a "GOOD" mic this radio works fine.

The second is a model 4022, 40 channel with digial display, has PA, local/distance switch an an extend button (audio compression I believe). A motorola mocat power mic is included with this unit. This one also has a top mounted speaker and external speaker jack.

Both units work, however 1 mic is iffy and I have only one power plug. Its a common plug so finding a replacement is not an issue. There is no mounting bracket for either unit.

Asking $125 for the pair. Will consider trades or offers. Looking for GMRS,FRS, ham radios, Also looking for mobile and hand held programmable scanners.

Following equipment for sale...need cash...must get things happening in my life, and that takes funds:

1. Yacht Boy 400pe: less than 1 mo. use...nice unit, w/ac adapter, manuals if I can find them: I would like $100 bucks, if possible, but will be flexible on the price.

2. radio shack DX-394 Shortwave reciever....good condition. I would like 75 bucks, but will be negotiable on the price

3. Uniden bearcat 100-channel scanner:bc198xlt: 50 bucks, but will gladly negotiate.

Buyer pays shipping costs...money orders preffered, but personal checks also accepted, provided they do not bounce.

Call 717-867-4876 ANYTIME, ask for Hank

Or, reply via email to: hank@ezonline.com

Thanks, friends.

What may be easier, is to find a mud, or talker, in .nz, or .au,
logon at around local midnight, and then see if anyone mentions
anything, or if you suddenly lose connection.
Or a webcam, etc...

Also, if computers start exploding, and everything more complex than
the lever stops working, it's likely to get at least some news coverage.
Plus, I assume that at least some of the TV stations will be broadcasting
live from there, as they go round the world, following the new day, so
those may be a source of info.

Can somebody volunteer to set up a site to which we could post pictures of things we have for sale for viewing by potential buyers? Set it up so they disappear after 1-2 weeks, maybe, to make it self-maintaining.

That way, somebody with a gadget to sell could post his scanned photo to your site so that anybody wanting to see it could just go there and look. He could do the descriptive text along with the link in his post here, and you have only the photo there.

No dealers should post photos, of course (you don't want to get overwhelmed). Just for one-of-a-kind personal sale stuff. Sure would save a LOT of trouble emailing photos to each inquiry (been there, done that!)

Anybody?

Hi -
I have for sale as a package the following:
Kenwood TS-870S S/N: 70500197

Stock this radio is all filtered up. the Queen of the current line of
Kenwoods.
Learn more about it here:
Kenwood Web site - TS-870S

Kenwood SP-31 matching speaker

Astron Power Supply SS-30 M

All the above are in cosmetically and functionally perfect.

Also included is the package beside the hand mic. is a Heil HM-10 Dual
(#4
DX and #5 Reg. Elements) Mic. with the kenwood cord. However I am
keeping
the foot switch. So you would need to pick up a FS-1 or HS-1 switch.
Now Iv had the Mic. since I was a teen and my last call is engraved on
the
Heil only. (Yes I quit doing that years ago). Just so you know.

Please view the items here:
http://www.wanfear.com/~rich/ts-870s.jpg

My price is $1725.00 shipped in the lower 48
I would consider offers on price but no trades please.

I have a complete 2 meter mobile radio.
Radio is an Icom-25A 2 meter synthisized radio. Includes orginal box,
schematics and parts layout sheet. (might have org docs someplace).
Radio has touch tone mic and power cord. Power cord is wired for a cigertte
light connections. I also have a 2 meter mobile antenna to go with the
radio. Quick in and out of any car. Complete mobile station. Good for mobile or
use for a packet or APRS station as well.

Asking $125. will consider offers or trades.

Hello Barry,

It could seem like a nice joke repeating all that "zeroes" trash that
guy posted (hopefully by mistake), but you did it on purpose, and
TWICE.
Isn't this a waste of bandwidth for us reading this newsgroup?
You could have done the same without all that garbage of zeroes,
simply writing <snip> instead of all that junk, and we would have
understood the same (and maybe liked it a little more).
The second time was a pure waste.
I hope you take this as a friendly guidance to netiqette.
cheers.

Thanks and best regards,
T-man

Note: when posting a Reply, please send me a copy
via email too so I don't miss any responses. Don't
forget to remove the "97" from my email address
inserted as an anti-spam counter measure...:-)

RS Pro 2006 for trade. This is a 9 out 10 radio. It has the manual and ant. with it. It has been modified for increased receive. It covers from 25.0MHz to 1.3GHz. This is probably the best scanner for under 800 bucks. Would like to trade for an HF rig. I am posting this for my news group impaired friend N5PXH. Please reply via email to myself (and I will forward to him) or to George at spydor@hotmail.com . Would also consider cash offer but would really like a transceiver.

Ok Gary, let's deal. I have been after a Motorola CB for ions....what I propose for a fair trade is a Regency MX 3000 30 channel mobile/base scanner. In very good condition, I replaced the lossy motorola connector with a BNC, touched up the alignment (I'm a two way radio tech), and generally cleanedthings up a bit. I have the manual, AC adapter for home use, mounting bracket, knobs, DC line.
Other goodies for trade or sale:

Regency MX 5000 receiver, 25-550Mhz, AM, NFM, WFM manual, box, ac supply. Asking $75.00

Radio Shack PRO 64 Scanner. 400 memories, does all the typical freqs, cell blocked, although I've heard of a mod. Nicad pack, charger, leather case, original boxes $125.00

Yaesu FT 2700 Dual band mobile. Mounting bracket, duplexer, mike...works well, but needs a new michrophone. Has pl encode/decode capability. $100.00
73,s

With that kind of poor customer service, and with all the other compitition out there, I think it would be safe to say, DON'T DEAL WITH LAKEVIEW ANTENNA COMPANY! If enough radio enthusiasits take this position, I'm sure it will hurt their business.

Pro Am antennas are easier to adjust. You only have to do it once.

Piero:
Let me just say that if you want customer service, go with Larsen. Yes they will cost a little more up front, and they might not look as sleek as some, but you can't beat the warranty. 3 years. One time I called them and said I had a probem with a dual band rubber duck, they sent me a new one and said just destroy the old one, no questions. Another time I had a coil on a 5 year old antenna crack (yes, I told them I did not have a receipt and it was 5 years old), they still replaced it free. Larsen has great customer service.

Where do I find one?
The GE Superadio is available from many retailers, including K-Mart, Lechmere's and Costco, to name just a few. Bennett Brothers is at least one mail-order source for the radio; Street price is between $35-$55. J&R Music World in NYC also has it in stock and ships fast: 1-800-221-8180.

Refurbished radios may still be available from Thomson Consumer Electronics at 800-933-5489; price is around $26 + $6 S&H, but call first.

Yes Doug, I do that now. I was not the one originally with the customer service problem, another person was, I was only replying to their post. I had a bad experience with Lakeview employees (owner?) at the 1998 Dayton Hamfest and I will never deal with them again! He was rude and ignorant. The others working behind the table said he was having a "bad day", but he didn't have to take it out on me.

I have zenith windcharger forsale. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. It works, but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for the shack. Will sell or trade(full or partial) for one(or more) of the items below.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
mobile HF rig.
Mobile HF antenna system.
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8
interesting radio/ham items (send me your trade list)
interesting computer items (send me your trade list)

For sale:

Icom IC-W32A 144/440 MHz Dual Band Handheld

Advanced Operations Have Never Been Easier!

"With its five big watts and a plethora of features, the IC-W32A provides
just about everything you could possibly need in an H-T. Best of all,
perhaps, the IC-W32A makes a serious effort to take some of the pain out of
using a small, complex piece of technology" -- QST, July 1997

- Dimensions: 2.25 (W), 5.5 (H), 1.4 (D), 16 oz
- 5 Watts of power @ 13.5 V
- 200 memory channels
- 8 character alphanumeric memory channel identification, keypad entry
- Backlit display and keypad
- ICOM rugged! Meets MIL SPEC C/D/E for shock and vibration
- Handheld to handheld cloning capability or PC programming capability
- Independent band controls for tuning and volume
- VHF/UHF exchange function

More detailed IC-W32A specifications and options at
http://www.icomamerica.com/amateur/dualhand/
